## 2000 Mad City Masters <br> Tossups by Mike Angel's Team

1. It begins at night when the town is still and ends the next night. One humorous character is Mr. Pugh, who sits at a table reading a book entitled Lives of the Great Poisoners, trying to devise a way to poison Mrs. Pugh. When asked by Mrs. Pugh what he is reading, Mr. Pugh responds Lives of the Saints. Reverend Eli Jenkins delivers a "sermon" when he goes outside to watch the sun rise. In the end, Mog Edwards and Myfawny Price embrace while the drunk Mr. Waldo hugs Polly Garter. For 10 points-name this look at the life in the town of Llareggub, a radio play for voices by Dylan Thomas.

Answer: _Under Milk Wood_
2. This son of a petroleum engineer attended the University of Baku and became head of theoretical physics at the Institute of Physical Problems in Moscow. In 1938 he, along with E. M. Lifschitz, began to publish a series of famous textbooks. He used the concepts of a phonon and a roton to explain the superconductivity properties of helium II and helped to explain superfluidity. For 10 points-name this Russian physicist and 1962 Nobel Prize winner nicknamed "Dau."

Answer: Lev Davidovitch _Landau
3. His high school teammates called him "Thomas Edison" because of all of the dazzling moves he invented on the playground. In college, he averaged only 7 points per game his freshman year; by his senior year, he averaged 41.5 points per game en route to leading the Winston-Salem Rams to the NCAA College Division Championship. He won Rookie of the Year honors in the NBA and played alongside Wes Unseld on the Baltimore Bullets before being traded to the talent-laden Knicks. For 10 points-name this sugar-sweet guard whose number 15 was retired by the Knicks; nicknamed "The Pearl."

Answer: Earl _Monroe_
4. He tempted a priest's son with dancing girls, but to no avail. That son had three heads and was beginning to master the universe, which made this god uneasy. So the god killed the son, and his father, Tvashtri, sent a creature against him who could not be killed by solid or liquid, at day or at night. One evening at twilight, this god saw some sea foam containing Vishnu and hurled it at the dragon, killing it. For 10 points-name this Vedic god who rides a solar chariot and wields a thunderbolt, who also serves as a storm god.

Answer: _Indra_
5. He is responsible for the theory of revealed preference, and worked on integrability and utility measurement. He introduced the use of comparative statistics through his "correspondence principle," and, with Bergson, developed a set of social welfare functions. He is the author of Linear Programming and Economic Analysis, Economics: An Introductory Analysis, and Foundations of Economic Analysis. For 10 points-name this MIT professor and winner of the 1970 Nobel Prize for Economics.

Answer: Paul A. _Samuelson_
6. The works in this series were inspired by Japanese subjects and many of them were done by the artist as he took twilight walks along the Thames and memorized the landscapes. The artist thinned his pigments with turpentine and let them saturate the canvas. Some of the subjects in this series, painted in the mid 1880 s , include the entrance to Southampton water, the Cremorne lights, and Valparaiso Bay. For 10 points-name this series of works showing twilight landscapes that derived their name from the artist's desire to create music in painting, a series by James McNeill Whistler.

Answer: _Nocturnes_
7. In Stoppard's Invention of Love, A. E. Housman spends much of the play discussing this Roman poet. When he was young, his family's estate was confiscated and he went to live in the house of the patron Maecenas. He wrote "The Queen of Elegies" upon the death of Cornelia, Augustus' stepdaughter. He broke off his tempestuous affair with a woman sometimes referred to as "Hostia" in 24 BC and she died shortly thereafter. For 10 points-name this poet, the lover of "Cynthia" and author of four books of elegies whom Ezra Pound addressed in a famous 1918 poem.

Answer: _Sextus Propertius_
8. The British, numbering 3,000 troops under General Gordon Drummond, had been retreating until July 5, when they deployed across a roadway. The Americans under Jacob Brown attacked the British, with Winfield Scott leading the assault on a key position. The Americans were beaten back with casualties numbering about a thousand, and the defeat nullified the victory gained at the Chippewa River two days earlier. The British chased the Americans back to Fort Erie after-for 10 points-what battle of the War of 1812 ?

Answer: _Lundy's Lane_
9. This type of cell may be governed by Faraday's law. A special type of this cell, called the Down's cell, is sometimes used to produce sodium and chlorine from molten sodium chloride. This type of cell differs from others in that the anode is the positive terminal while the cathode is the negative terminal. Its purpose is to liberate a gas or to deposit a metal. For 10 points-name this type of cell that employs a non-spontaneous redox reaction and must use an outside electric source to drive it, and which is named for the single solution it contains.

Answer: _electrolytic_cell
10. He went to the same high school as Kevin Garnett and they were in the science club together. Spike Lee offered him a role in a romantic comedy, but he preferred an action movie because he does his own stunts. He clogged the filter, so he is no longer able to have pool parties, and Tyra Banks left her toothbrush at his place. Furthermore, you couldn't guard him; the Secret Service couldn't guard him. Wearing number one-half, this is-for 10 points-what diminutive friend of a former Orlando Magic guard in commercials?

Answer: _Lil' Penny_
11. In addition to the three main islands, this country claims the French dependency of Mayotte as part of its territory. The highest point in the country is Mount Karthala, which is an active volcano. The capital contains the Chiounda mosque, which is a pilgrimage site. The country is governed by a 42 -member assembly and two of the main islands are Anjouan and Moheli. For 10 points-name this island nation with its capital at Moroni, that is located east of Mozambique.

Answer: _Comoros_
12. After his wife leaves him, he cries to Joan Clements, "I haf nofing left, nofing, nofing!" His wife had only visited him to try to elicit support for her son Victor, whom she had by another man. The titular character is defeated by the English language, train schedules, machinery, and human villainy throughout the novel. He is a teacher of Russian at an upstate New York college whose name he always mispronounces as "Vandal College." In the end, he leaves the world of academic fraud at Waindell College to drive off into a distant mist. For 10 points-name this 1958 novel by Vladimir Nabokov with a funnily-spelled title.

Answer: _Pnin_
13. After graduating from Yale and Harvard Law School, he became first undersecretary of the Treasury in 1933. The author of Morning and Noon, and Power and Diplomacy, he was instrumental in the non-recognition of Communist China. In January of 1950, he purposely excluded Korea from the "defensive perimeter" of the U.S. in the Far East. He was responsible for formulating early Cold War policies to contain communism, helped devise the Marshall Plan, and served as undersecretary of State from 1945 to 1947. For 10 points-name this man who served as Secretary of State from 1949 to 1953.

Answer: Dean (Gooderham) _Acheson_
14. It is maximized when theta equals 0 and at a minimum when theta equals 90 degrees. Theta is the angle between B and the normal to the plane of the loop. In general, its value is proportional to the number of lines passing through the loop, and it is given by the equation phi equals B times A times the cosine of theta. For 10 points-what is this quantity that can be used to induce an emf and whose SI unit is the Weber?

Answer: _magnetic flux_
15. He spent the 1999 season playing for the Berlin Thunder in NFL Europe before retiring. He had spent three previous years in the CFL, mostly as a backup. He stopped at Minnesota and Jacksonville after four disappointing years in the city that drafted him, where he produced only 5 touchdowns. He is proof that having Wayne Fontes as a coach and Rodney Peete as a mentor are detrimental. For 10 points-name this big-time bust drafted by the Lions out of Houston, who was awarded the 1989 Heisman for terrorizing pathetic SWC defenses and throwing hail mary's when the game was out of reach.

Answer: Andre_Ware_
16. When this opera debuted in Rome, a cat walked about the stage throughout the first act. It opens with the serenade "Ecco ridente il cielo." The main character disguises himself twice to see his love, first as a poor music student named Lindoro, and second as a student of Don Basilio, Rosina's music teacher. He must don these disguises to get past old Dr. Bartolo, who has plans on keeping Rosina for himself. In the end, however, Count Almaviva marries Rosina. For 10 points-name this opera by Gioachino Rossini.

Answer: The _Barber of Seville_ or Il_Barbiere di Siviglia_
17. He began playing at "Honey's," a bar named after his mother. He described his first band as "terrible," so they
just started playing softly, and the style stuck. Backing him were the five Aliis, who played instruments like the xylophone. He often could be seen smoking and drinking a glass of scotch at his organ before giving those habits up, but he still invites people onto the stage to be kissed. For 10 points-name this performer of such songs as "Tiny Bubbles" and "With All My Love" who hails from Hawaii.

Answer: Don_Ho_
18. The first point was that soldiers and sailors could not be billeted on individuals against their will; the second point was that commissions for martial law could not be issued in the future. The third point was that no man should be imprisoned without cause shown, while the fourth point prevented the King from compelling an individual to give a gift or loan without consent from Parliament. The King responded in vague terms but, in the end, in return for a substantial grant, gave firm assent to this 1628 document. For 10 points-name this document, suggested by Edward Coke, that guaranteed civil liberties during the reign of Charles I.

Answer: _Petition of Right_
19. One risk encountered when consuming transgenic food is that this process will occur in the intestines. Streptococcus pneumoniae is one of the only human microbes capable of carrying out the natural form of this process. The artificial form can be achieved through heat, salt, or electric shock, in which case the DNA may remain double stranded. In the natural form of this process, the DNA used is single stranded, and usually chopped-up. For 10 points-name this process by which microbes take up naked DNA from the environment.

Answer: _transformation_
20. In one work this character recounts a story in which one of his acquaintances "did a girl in" and kept her in a tub of lysol. In that same work, this character threatens to carry off Doris and cannibalize her. He also repeats that phrase "I gotta use words when I talk to you." He appears in another poem whose epigraph is the dying words of Agamemnon from the Aeschylus play. That poem opens by describing him as "apeneck" and "spreading his knees." For 10 points-name this poetic character whose name precedes "Erect," "Agonistes," and "Among the Nightingales" in three works by T. S. Eliot.

Answer: _Sweeney_
21. He studied at the University of South Africa before moving to Ghana to teach. While there, he was impressed by Kwame Nkrumah and moved back to his home country where he worked with Joshua Nkomo for independence. He split with Nkomo in 1963 and advocated deposing the white government. He spent ten years in prison and led a coup from there. He was released in 1975 and, with the help of Nkomo, formed the Patriotic Front, which waged war on the government. For 10 points-name this man who, in 1980, became Prime Minister of Zimbabwe.

Answer: Robert Gabriel_Mugabe_
22. They were written between 1791 and 1795 , and most premiered during visits by the composer in late 1794. They are the Breitkopf numbers 93 through 104, and were written for the impresario J. P. Salomon. They take their name from the last symphony, and among them are the "Miracle," "Drum Roll," and "Clock." For 10 points-name this collection that includes the "Military" and "Surprise," the last twelve symphonies of Franz Joseph Haydn that took their name from the European city they debuted in.

Answer: _London_symphonies

## 2000 Mad City Masters <br> Bonuses by Mike Angel's Team

1. Answer these questions about an event from American history, for 10 points each:
A. This man, a millionaire at age 30, became chairman of the Carnegie Steel Company in 1889 and was known for his ruthless management practices.

Answer: Henry Clay _Frick_
