# MISCELLANEOUS QUESTIONS FAIR GAME FOR OTHER ROUNDS FROM USF

### REWORD OR DROP

14. She steamed down the Elizabeth River into Hampton Roads and sunk the 24-gun sloop, the "Cumberland", and then the 50-gun frigate, the "Congress" before her progress was impeded by a Union ship designed by John Ericsson. For 10 points, name this Confederate ironclad built on the hull of the U.S.S. Merrimac which faced the U.S.S. Monitor on March 9, 1862.

Answer: C.S.S. Virginia (Prompt on "Merrimac")

23. This University of Chicago professor taught that the mind is the natural emergent from the interaction of the human organism and its social environment. Within this bio-social structure, the gap between impulse and reason is bridged by the use of language. For 10 points, identify this psycho-philosopher whose posthumously collected works include "The Philosophy of the Present" and "Mind, Self, and Society."

Answer: George Herbert Mead

This English king, born in 1442, succeeded to the throne in 1461 as the leader of the Yorkist party during the War of the Roses. His reign was interrupted when Richard Neville, the Earl of Warwick, teamed together with the former Queen Margaret to place the former King Henry VI back on the throne. Name this monarch, grandfather of Henry VIII, who regained his throne in 1471 after his victories at the Battles of Barnet and Tewkesbury.

# ANSWER: Edward IV (prompt on Edward)

Venus loves the title character until he calls upon the Virgin Mary to free him. He then returns to Elisabeth [eh LEEZ a bet], but Wolfram [VULF ram] forces him to seek absolution. The Pope says his staff will bloom before he forgives the title character. Elisabeth commits suicide, and the title character dies by her funeral bier, just as a messenger arrives announcing that the Pope's staff has grown leaves. For ten points, identify this 1845 Wagner opera.

Answer: Tannhäuser

During the War of 1812, he was appointed brigadier general in charge of Indiana and Illinois and defeated the combined forces of the British and Native Americans at the Battle of the Thames. He went on to represent Ohio in Congress. FTP, identify this general, who won the battle of Tippecanoe in 1811 and had a short-lived stint as the ninth president.

Answer: William Henry Harrison

During the French Revolution, this Jacobin was the first president of the Committee of Public Safety. In July 1793 he was not reelected to this post, due to disagreement with his moderate policies. His views, conservative relative to leaders such as Robespierre, and his criticism of the Reign of Terror led to his trial and execution, at which he told the guillotiner "Show my head to the people, it is worth seeing." FTP, name this French Revolutionary leader.

Answer: Georges Danton

- 9. 10. Let's roll the dice. Answer the following for 10 points apiece (Moderator, please allow 15 seconds for each part):
- [10] If you throw two dice, what is the probability of getting a sum larger than 7?

Answer: 15/36

[10] When you throw three dice, what is the probability that they will come up with a sum of 3?

Answer: <u>1/216</u>

[10] When you throw four dice, what is the probability of getting a sum of 4?

Answer: 1/1296

d.

18. Given a language, identify the country in which it is primarily spoken, for the stated number of points:

[5] Urdu Answer: <u>Pakistan</u> [5] Farsi Answer: <u>Iran</u>

[10]Telugu Answer: India
[10] Sunda Answer: Indonesia

25. Answer the following about animated movie classics for 10 points apiece:

[10] Paul Lynde provided the voice for Templeton the rat in this film based on E.B. White's book.

Answer: Charlotte's Web

[10] Don Knotts was a milquetoast who dreamt of being a fish in this film.

Answer: The Incredible Mr. Limpet

[10] This was the story of a family of rabbits seeking a safe place to live, based on Richard Adams' novel.

Answer: Watership Down

- 21. Given some major port cities, name the country in which they are located on a 10/5 basis:
- [10] Buenaventura
- [5] Cartagena

Answer: Colombia

[10] Temeuzen

[5] Rotterdam

Answer: Netherlands (or Holland)

[10] Mosselbaai

[5] Durban

Answer: South Africa

#### PENN BOWL 10

Massachusetts Institute of Technology

Questions by Ronojoy Chakrabarti, Ahmed E. Ismail, Joe Kushner, Chris Luhrs, Mike Usher, Josh Thompson, and Tao Yue

### **TOSSUPS**

Science

[CL] In this work, the term "complex number" is introduced, as is the first formal statement of the fundamental theorem of arithmetic. A proof that every integer is the sum of three triangular numbers, quadratic reciprocity, congruence classes, and a construction of the regular seventeen-sided polygon all appear in, for ten points, what masterpiece of Karl Fredereich Gauss?

Answer: Disquisitiones Arithmeticae

[TY]

### Literature

[MU] His mother Fanny left him behind when she took a trip to America that resulted in her 1832 work *Domestic Manners of the Americans*. From 1859 to 1867 he would daily write 2500 words before breakfast while maintaining the civil service job that resulted in his invention of the mailbox, an invention ridiculed by a character in his novel *He Knew He Was Right*. FTP, name this popular author of *The Eustace Diamonds* and *Barchester Towers*.

ANSWER: Anthony Trollope

[MU] Said to be influenced by controversy over the suppression of an 1865 Jamaican rebellion, this novel opens with the death of Durfey and the return of his brother Harold from the Ottoman province of Smyrna. Set in Treby Magna after the passage of the 1832 Reform Bill, its popularity has suffered because of its long-winded discussion of legal issues surrounding the inheritance of the Transome estate. FTP, what is this novel about two different kinds of radicalism, written by George Eliot?

ANSWER: Felix Holt, the Radical

[CL] The title character is a fifty-five year old millionaire discontented with life in America. He travels to Africa where he destroys the Romilayu water supply while trying to rid it of frogs. He earns his moniker when, by moving a statue of a woman, he allows a certain ceremony to take place. Eventually he decides to become a doctor and return to America. For ten points, name this Saul Bellow novel.

Answer: Henderson the Rain King

[CL] Over thirty publishers turned it down until the author agreed with Grove Press to accept all damages. Still, it sold a quarter-million copies in 1971. Following *Fuck the System* and *Woodstock Nation*, readers sent the author ways to beat the system. With chapters including "Free Food" and "First Aid for Streetfighters," for ten points, name this Abbie Hoffman work of the Yippie movement, whose title suggests that you procure it illegally.

Answer: Steal this Book

[JMT [JMT] History

[RC] This movement's ecumenical form argued that decisions of ecumenical councils had supremacy over the pope. Its Royal strand stressed the French kings' absolute independence from Rome in temporal affairs and its Parliamentary branch advocated complete subordination of the French church to the state. FTP, name this theological and political ideology supporting the relative independence of the French Catholic Church and the French government in its relations with the pope, the direct opposite of ultramontanism.

ANSWER: Gallicanism

[MU] [JK] [JK] [CL]

[TY]

#### Current Events

[RC] Al Gore and George W. Bush weren't the only people involved in succession dramas in November 2000. When he flew to Florida to celebrate his victory he adopted the pseudonym Mr. Cathcart. His boss diverted his jet in mid-air while he informed the runners-up that they had failed. FTP, name this former Dartmouth mathematician and football player, a Harvard Business School alumnus and successor to "Neutron" Jack Welch as CEO of General Electric. ANSWER: Jeffrey Immelt

[RC] A graduate of Northwestern and Yale Law, he had an eclectic caseload in the year 2000. In the summer, he defended Shawn Fanning and Napster from the predations of the recording industry. Before that, he worked for the Department of Justice in a major anti-trust case, securing a judgment against Microsoft in April. And in December, he and Laurence Tribe, were Al Gore's counsels in the post-election litigation in Florida. FTP, name this attorney. ANSWER: David **Boies** 

Popular Culture

[JK] [JMT] [JMT] He issued the admonition "Sit perfectly still: only I may dance!" while appearing on a show for which he used to write. Twice editor of the Harvard *Lampoon*, after his graduation he began writing comedy for HBO. A stint on Saturday Night Live brought an Emmy award, after which he wrote television episodes with titles such as "New Kid on the Block" and "Marge versus the Monorail." FTP, name this late-night talk show host. ANSWER: Conan **O'Brien** 

This resident of Palmyra, Wisconsin once ran a hunting camp. More recently she appeared on Hollywood Squares. She is more famous though for a speech in which she encouraged her comrades to let the snake eat the rat. For ten points, name this bitter loser who gave her support to Rich over Kelly on *Survivor*.

Answer: Susan (or Sue) Hawk

#### Fine Arts

[AEI] Its orchestration calls for two pianos and five each of flutes, oboes, and trumpets, but no clarinets, violins, or violas. The manuscript for this work belongs to the Boston Symphony Orchestra, which gave the work's 1930 American premiere under Serge Koussevitsky, who commissioned it. FTP, identify this Stravinsky work, whose three movements are played without pause, most notable for including a four-part chorus singing Biblical texts.

ANSWER: Symphonie de Psaumes or Symphony of Psalms

[CL] [AEI] The Greek vase painter Euthymides was noted for being one of the first to study this method. The development of "natural" perspective was a prerequisite to its development, since the technique attempts to record three-dimensional distortion seen by the eye in two dimensions. In general, this term is only used to describe single objects, as opposed to collections of objects. FTP, identify this technique which describes the rendering of a specific object or figure in a picture in depth.

Answer: foreshortening

Religion/Mythology/Philosophy

[JK] This work poses significant questions about the nature of reasoning in regard to matters of fact and experience, which are answered by recourse to the principle of association. One conclusion of this work is that any demonstrative science of fact is impossible, which leads to the basis for the author's doctrine of causality. FTP, identify this work, David Hume's attempt to define the principles of human knowledge.

ANSWER: Enquiry Concerning Human Understanding

[JK] In the closing portion of this biblical book, Paul expresses his interest in recruiting aid for a future journey to Spain. In doing so, this letter contains the most systematic unfolding of Paul's ideas, including the notions of humanity being lost without the Gospel, both Jews and Gentiles being a part of God's plan, and justification by faith. FTP, identify this book, usually the first, and the longest, of the New Testament letters.

ANSWER: Letter to the Romans

[CL] He is not Arthur, but he does pull a sword embedded in a stone by Merlin. Unlike his father, his greatest virtue is his chastity, which allows him to complete the quest his father could not. His relationship to Joseph of Arimathea and ability to sit on the Siege Perilous predict his success. For ten points, name this son of Lancelot and Elaine who completes the quest for the Holy Grail.

Answer: Sir Galahad

Social Sciences

[MU] [MU]

Geography

Your Choice

One method involves starting at Cairo. Another involves measuring the gender of the object, thus collapsing it into one eigenstate. The set-theoretic approach involves observing a dead rabbit and a geometric method calls for placing oneself in a cage and performing an inversion. For ten points, identify this objective written about by H. Petard involving catching a wild animal of a certain region in Africa.

Answer: How to Catch a Lion in the Sahara Desert

#### **BONUSES**

#### Science

[JK] Identify these parts of the mitochondrion, FTPE

[10] These are the folds of the inner membrane, which contain the components for oxidative phosphorylation.

ANSWER: Cristae

[10] This the space enclosed by the inner membrane.

ANSWER: Matrix

[10] This compound is located between protein complexes III and IV in the electron transport chain, and is often used in comparing genetic differences between species.

ANSWER: cytochrome C

[JK] Identify the people behind these key experiments from genetics, FTPE.

[10] Their experiment showed that only the semi-conservative model for DNA replication was valid. Five points each, name them.

ANSWER: Mattler Meselson and Frank Stahl

[10] Their experiment used bacteriophages to show that DNA was the genetic material. Five points each, name them.

ANSWER: Alfred Hershey and Martha Chase

[10] His experiments led to the observation that equal amounts of adenine and thymine, and cytosine and guanine, are present in DNA, leading to A-T and G-C base-pairing rules.

ANSWER: Erwin Chargaff

# [JK] [JK]

[CL] Identify the following milestone programs in artificial intelligence for ten points each.

[10] Created in the 1970's, it used a rule-based system to identify certain infections and suggest possible treatments. It was essentially the first expert system.

Answer: Mycin

[10] Written in 1967 by Joseph Weizenbaum, it simulated a Rogerian psychoanalyst by responding to user-inputted text.

Answer: Eliza

[10] It describes a class of programs in which robots move objects around in space with a certain goal in mind.

Answer: Block World

[TY] Given a citation for the Nobel Prize in Physics, identify any of the honored laureates, for the stated number of points.

[5] In 1921, "for his contributions to Theoretical Physics, and the discovery of the photoelectric effect."

Answer: Albert Einstein

[10] In 1949, "for his prediction of the existence of mesons on the basis of theoretical work on nuclear forces."

Answer: Hideki Yukawa

[15] In 1959, "for the discovery of the antiproton."

Answer: Emilio Gino Segrè or Owen Chamberlain

#### Literature

[MU] Name the following works by Edmund Spenser:

[10] Spenser's earliest notable work, which consists of 12 pastoral eclogues, each corresponding to a month of the year.

ANSWER: The Shepheardes Calender

[15] Spenser's 1595 work, consisting of 24 stanzas and 365 lines, celebrating his second marriage. Its 12-letter title is a general term for a poem directed to a newlywed couple.

ANSWER: Epithalamion

[5] Spenser's most famous work, in which the titular character, Gloriana, represents Elizabeth I.

ANSWER: The Faerie Queene

[MU] [AEI] Identify the authors of the following related poems from brief quotations, FTP each.

[10] "When most I wink, then do mine eyes best see,

For all the day they view things unrespected."

ANSWER: William Shakespeare

[10] "What is more gentle than a wind in summer?"

ANSWER: John Keats

[10] "She sleeps on soft, last breaths; but no ghost looms

Out of the stillness of her palace wall."

ANSWER: Wilfred Owen

[CL] Identify the following literary devices for ten points each.

[10] Repetition of a word or phrase at the beginning of successive words and phrases.

Answer: Anaphora

[10] Pretended omission of a fact as in "I shall not mention my opponents' criminal record."

Answer: Praeteritio(n) or Paraleipsis

[10] Understatement for dramatic effect as in "a nuclear holocaust might hurt a few people."

Answer: Litotes

[JMT] [JMT] Five points each with 5 points for all correct. Place in chronological order, from earliest to most recent, the following periods of Japanese literature: Kamakura, Azuchi-Momoyama, Tokugawa, Muromachi, Heian.

ANSWER: Heian, Kamakura, Muromachi, Azuchi-Momoyama, Tokugawa

### History

[RC] [MU] ANSWER the following about a Chinese dynasty, for ten points each:

[10] This dynasty, noted for its law code and for its production of such poets as Li Po and Tu Fu, ruled China from 618 to 907.

ANSWER: T'ang Dynasty

[10] Possibly the most memorable T'ang ruler was this woman, who rose from status as a concubine to take the throne as empress in 690 after ruling behind the scenes for decades.

ANSWER: <u>Wu</u> Hou (alternately called <u>Wu</u> Chao and <u>Wu</u> Tse-T'ien)

[10] Give the name of either the period of instability in northern China that came immediately after fall of the T'ang dynasty, or the corresponding period in the south.

ANSWER: Five Dynasties (Wu-tai) or Ten Kingdoms (Shih-kuo)

[JK] Identify the following acts of Congress, all passed in 1906, FTPE.

[10] This act was passed in response to the publication of Sinclair's The Jungle.

ANSWER: Meat Inspection Act

[10] This act established the creation of National Monuments.

ANSWER: Antiquities Act

[10] This act helped to reinforce the Interstate Commerce Act of 1887, and dealt mostly with

railroad rates.

ANSWER: **Hepburn** Act

[JK]

[CL] Identify the following relating to the life of Cyrus II for ten points each.

[10] In his rise to power, Cyrus overthrew this king of the Medes.

Answer: Astvages

[10] After an oracle told this Lydian king that a great empire would fall, he attacked Cyrus;

instead, it was the Lydian empire that fell.

Answer: Croesus

[10] Cyrus was succeeded by this son.

Answer: Cambyses

[JMT]

#### **Current Events**

[RC] Identify the following about the new President of Mexico. FTSNOP:

[5] Name him.

ANSWER: Vicente Fox

[10] President Fox was an executive in the Mexican branch of what gigantic multinational corporation, the only company whose stock is in Emory University's endowment?

ANSWER: Coca-Cola

[15] In December 2000, Fox announced a unilateral withdrawal of military forces from what province where separatist Zapatista guerrillas have been operating since the mid-1990's?

ANSWER: Chiapas

[RC] Identify the following people involved in the recent political scandals of Peru.

[5] This former President of Peru resigned in November 2000.

ANSWER: Albert Fujimori

[10] This former spy chief in Peru embezzled more than \$50 million while in office. His return to Peru precipitated the crisis.

ANSWER: Vladimiro Montesinos

[15] This former World Bank economist, Harvard lecturer, and runner-up to Fujimori in last year's elections could become the first Native American president of any Western hemisphere nation

ANSWER: Alejandro Toledo

# Popular Culture

[JK] Given an event in the 2000 Olympics, identify the gold medal winners in each, FTPE.

[10] 50-meter Men's Freestyle (two ANSWERs required)

ANSWER: Gary Hall, Jr. and Anthony Ervin

[10] The team that won men's soccer

ANSWER: <u>Cameroon</u>
[10] Women's Pole Vault
ANSWER: Stacey <u>Draglia</u>

[JMT] Given the name a rock band was once known by, give its more famous name FTPE.

[10] The Detours
ANSWER: The Who
ANSWER: The Band
ANSWER: The Band
ANSWER: The Beatles

[JMT] Given a quote from a movie, identify it, for 15 points each.

[15] "I can no longer sit back and allow Communist infiltration, Communist indoctrination, Communist subversion, and the international Communist conspiracy to sap and impurify all of our precious bodily fluids."

ANSWER: Dr. Strangelove

[15] "As I say, we tried to remove the tusks. But they were embedded so firmly we couldn't budge them. Of course, in Alabama, the Tuscaloosa but that is entirely ir-elephant to what I was talking about."

ANSWER: Animal Crackers

[JMT] FTPE, answer the following questions about Motown Records.

[10] This African-American man founded Motown in 1959 in Detroit, Michigan.

ANSWER: Berry Gordy, Jr.

[10] Gordy's discovery of this singer, who performed with *The Miracles* and was noted for his falsetto, led him to found Motown records.

ANSWER: William "Smokey" Robinson

[10] In 1988, Gordy sold Motown to this record company, which later sold it to PolyGram.

ANSWER: MCA

[AEI] Identify the composers of the following oddly-titled masses, for ten points each.

[10] Missa Papae Marcellis, an a cappella mass for eight voices

ANSWER: Giovanni Pierluigi da Palestrina

[10] Messe "cum jubilo," for baritone chorus, baritone solo, and orchestra

ANSWER: Maurice Duruflé

[10] Petite messe solennelle, a ninety-minute work for twelve singers, two pianos, and

harmonium

ANSWER: Gioacchimo Rossini

[CL]

Answer the following about painter Henry Tanner for ten points each.

[10] Tanner was taught by this painter of *The Gross Clinic* at the Pennsylvania Academy of Fine Arts.

Answer: Thomas Eakins

[10] Tanner received admission to the National Academy of Design in 1927, the same year as what female impressionist?

Answer: Mary Casatt

[10] The French government bought this religious work of Tanner in 1897, which had won a

medal at the Salon.

Answer: Resurrection of Lazarus

#### Religion/Mythology/Philosophy

[JK] Identify these Jewish holidays from brief descriptions, 5-10-15

[5] This holiday is also known as the Day of Atonement

ANSWER: Yom Kippur

[10] This holiday historically commemorates the giving of the Torah on Mt. Sinai.

ANSWER: Shavuoth

[15] This holiday is a day of fasting, commemorating the destruction of the first and second Temples.

ANSWER: Ninth of Ab

[CL] Answer the following about the Calydonian boar hunt for ten points each.

[10] This woman, the only one on the hunt, was the first to wound the boar with an arrow.

Answer: Atalanta

[10] This man, in love with Atalanta, finished the boar off with a spear.

Answer: Meleager

[10] The boar was sent to Calydon when this king forgot to offer first-fruits to Artemis.

Answer: Oenus

[CL] Identify people and places related to the epic of Gilgamesh for ten points each.

[10] Gilgamesh was king of this land.

Answer: Uruk

[10]: Gilgamesh befriended this wild man, created in the image of Anu.

Answer: Enkidu

[10] In pursuit of eternal life, Gilgamesh meets this man who survived a great flood that killed all

other living things.
Answer: <u>Utnapishtim</u>

# Social Sciences

[MU]

[MU] Name the following child psychologists, FTP each:

[10] Based on tests he gave to schoolchildren, this psychologist identified four stages in the development of a child's ability to think, beginning with the sensorimotor stage.

ANSWER: Jean Piaget

[10] This author of *Young Man Luther* identified eight stages of psychosocial development in his 1950 work *Childhood and Society*.

ANSWER: Erik Homburger Erikson

[10] Inspired by Piaget, this psychologist separated children's moral development into preconventional,

conventional, and postconventional stages.

ANSWER: Lawrence Kohlberg

# Geography

[MU] Name the country from cities, for the stated number of points:

[5] Lahore, Karachi ANSWER: Pakistan

[5] Medellin (Meh-day-yeen), Cali

ANSWER: <u>Colombia</u>
[10] Kharkov, Donetsk
ANSWER: <u>Ukraine</u>
[10] Stavanger, Bergen
ANSWER: <u>Norway</u>

### Your Choice

Identify the following from the geography of Venus for ten points each.

[20] Name the two major continents or terrae of Venus, each named after a goddess of love.

Answer: Aphrodite Terra and Ishtar Terra

[10] Ishtar Terra is dominated by this large plateau, named after a female in Hindu mythology.

Answer: Lakshmi Plenum

Penn Bowl 10

Packet by Chicago A and B

(Amanda Butler, Susan Ferrari, Emily Hilligoss, Kathleen Moriarty, Ben Neale, Peter Onyisi, Stephanie Walker, Leah Williams)

### **TOSSUPS**

### [Science]

This empirical principle is equivalent to the fact that the log of the ratio of the volumes accessible, at boiling point, to a molecule in a gas and in a liquid is approximately ten. It works best for substances with large, non-interacting molecules, and Hildebrand's rule improves on it. FTP, give the name of the observation that, for many substances, the entropy of vaporization at the standard boiling point is around 88 Joules per mole degree K.

Answer: <u>Trouton</u>'s rule (do not prompt on Hildebrand's rule)

Proposed in 1923, this theory is used in describing the formation of complex ions. It includes H plus and NH3 as bases, but it does not consider HCl an acid. It extends acid-base concepts to reactions in gases and solids, not

being limited to reactions involving a hydrogen ion or a hydroxide ion. FTP, identify this theory of acids and bases in which an acid is an electron-pair acceptor while a base is an electron-pair donor.

Answer: **Lewis** acid-base theory

A class of fermions, a type of vector notation, and a function that isn't a function all bear his name. "The square root of the Klein-Gordon equation" is a tongue-in-cheek description of his famous equation, which describes spin-1/2 particles. FTP, identify this Cambridge and Bristol educated physicist who shared the 1933 Nobel Prize for the work that lead to the prediction of antimatter.

Answer: Paul Adrien Maurice Dirac

A granddaughter of William the Conqueror and the only daughter of Henry I, this woman was married at age 12 to Holy Roman Emperor Henry V. Her brother, William the Aetheling, died in 1120, making her Henry I's only legitimate heir. Her 1128 marriage to Geoffrey of Anjou and the birth of her first son were thought to be adequate to secure her ascension to the throne, but another of William the Conqueror's grandchildren challenged her. FTP identify this short-reigned queen, whose cousin, Stephen of Blois, usurped the throne, mother to the first Plantagenet kind, Henry II.

Answer: Matilda\_ or \_Maud\_

They are ordered arrays of globular proteins as alpha-betadimers. The N-end of the protein strand has a GTP binding site, the central part has a colchicine binding site. Anoxemial and cytoplasmic are two types of this cytoskeletal structures, which are closely related in structure to flagella. FTP, name these hollow tubes that pull chromosomes apart during anaphase.

Answer: Microtubules

First identified in 1963 by Lejeune, this syndrome can cause epicanthal folds, low-set ears, microcephaly, and varying degrees of mental retardation. It is caused by a chromosomal deletion on chromosome 5. FTP, name this syndrome, whose best-known symptom is the high-pitched cry produced by affected newborns.

Answer: Cri du chat syndrome

# [Literature]

Its title refers to the interval just before true spring. The final stanza of this poem begins with the lines "But yield who will to their separation/ My object in living is to unite/ My avocation and vocation." A man is in his yard, enjoying chopping wood, when two workmen come to him with the intention of chopping his wood for pay. He yields to them, allowing them to do the job they love and need. FTP, name this Robert Frost poem.

Answer: Two Tramps in Mud Time

They are four-line stanzas of equal rhythm. Sometimes, all four lines rhyme, but, as in the most famous one, the third line may be blank. This famous one includes the line "A Jug of Wine, a Loaf of Bread - and Thou" and was translated into English in 1859. FTP, name this form, the most well-known works of which are by Omar Khayyam.

Answer: Rubaiyat

She comes to Chicago from Columbia City, Wisconsin, intending to live with her sister Minnie and find work in a department store. But she soon wearies of the working life and gives in to the overtures of a young businessman she met on the train into the city, living as his "kept woman" until she runs off to New York with an older, richer man who dies homeless while she becomes a renowned actress. For ten points, identify this Theodore Dreiser title character.

Answer: Sister Carrie

# [History]

The two main periods of this empire are named for their capitals, Napata and Meroe [Mer-ohway]. Its rulers formed the short-lived twenty-fifth dynasty when, around 770 BC, under the leadership of Kashta and his son Piye [Pie], this empire stretched north to encompass Egypt. FTP, name this kingdom that controlled parts of Nubia from the eighth century BC to the fourth century AD.

Answer: Kush

He engaged in ritual levee and couchee, or risings and retirings, and surrounded himself in laurels, lyres and tripods, to emulate his emblem. His mother, Anne of Austria, reigned in regency for a period of rebellion known as Fronde. FTP, who was king of France during the war of the Spanish Succession and ruled under the moniker of the sun king?

Answer: Louis XIV

[Current Events]

[Popular Culture and Sports]

This 1977 Hall of Fame inductee played his first game for the Detroit Red Wings in 1951 and played his last game, also for the Red Wings, in 1973, when he retired to become the 'Wings coach. FTP, name this center and three-time Lady Byng winner whose number 10 hangs from the rafters in the Joe Louis Arena.

Answer: Alex Delvecchio

"Drugs are a bet with your mind," said this son of a naval officer. He attended junior college in Florida and film school at UCLA, but didn't finish. Born in Florida in 1943, this poet, filmmaker, singer, and songwriter lost his bet with his mind on on July 3, 1971. FTP, name this lizard king, who sometimes referred to himself as "Mr. Mojo Risin" which was an anagram of his name.

Answer: Jim Morrison

[Fine Arts]

The European Cobra group shared many of itsideals. Approaches included color-field and action painting. MiltonAvery, Helen Frankenthaler, Philip Guston, Joan Mitchel, Arshile Gorky, and Franz Kline were all, FTP, associated with what art movement, whose most prominent members were Willem De Kooning, Mark Rothko, and Jackson Pollock?

Answer: Abstract Expressionism

[Religion/Mythology/Philosophy]

On an episode of A Prairie Home Companion, this woman called in to a radio help show. She mourns all day long. Her brother lives in exile. Her little sister was sacrificed to appease the gods. Her mother has an affair with a usurping king, and those two murdered her father. FTP, name this woman, who teams up with brother Orestes to kill Aegisthus and Clytemnestra.

## Answer: Electra

It is the oldest surviving book in any Indo-European language, dating from about 1000 B.C., though the contents most likely originated many years before this. In it, Agni, Soma, Surya and Varuna appear, but Indra is the most higly praised. FTP, name this work, the oldest of the Vedas, whose name means "praise".

Answer: Rig Veda

Written in 524 A.D., this poetic work of philosophy remained a popular and influential work until the end of the Renaissance. Its theme of the triumph of reason over the temporary pitfalls of earthly life was inspired by the author's own unjustified dispossession and imprisonment at the hands of the Roman senate. For ten points, identify Boethius's classic work of medieval humanistic thought.

Answer: The Consolation of Philosophy

## [Social Sciences]

Clement \*Juglar was the first to study these phenomena, and Jevons proposed sunspots as their cause. More recent theories to explain them include overinvestment, underconsumption, technological shock, and multiplier-accelerator interaction, and they have been studied with Fourier analysis. FTP, identify these periodicities, whose phases were described by Schumpeter as boom, recession, depression, and recovery.

Answer: business cycles

She was born in Camden, New Jersey, in 1946. She's been accused of flipping off Adam Dershowitz during a 1981 debate; being antisex, antilesbian, and antiabortion; and, most famously, declaring that all heterosexual intercourse is rape. FTP, name this controversial gender theorist, author of Intercourse and co-author of Pornography and Civil Rights.

Answer: Andrea Dworkin

## [Geography]

The fourth-longest river in Europe, it is divided into three parts: the lower, which flows from \*Zaporizhzhaya to the mouth of the river, the middle, which flows from Kiev to \*Zaporizhzhaya, and the upper, which flows from its start north of Smolensk to Kiev. FTP, name this river, along which a route from the Varangians to the Greeks developed between the 4th and 6th centuries. Answer: **Dnieper** 

# [Your Choice]

It is a family of 23 languages spoken by more than 165 million people in south Asia. The most widely spoken of these languages is Telugu. Its origin is largely unknown, but the prevailing hypothesis is of a link between this family and the Uralic and Altaic families. FTP, name this language family, whose speakers are concentrated mainly in India and Pakistan.

Answer: Dravidian

Initially, it was produced using ether, which was dangerous, because ether ignites when lit. A more convenient method of producing the liberated "base" form of it, which involves heating in a solution of baking soda, has become popular in the last 30 years. FTP, name this substance, so named because of the sound it makes when heated.

Answer: crack

#### **BONI**

## [Science]

Answer the following questions about a type of mathematical structure, FTPE.

[10] What is the name for a set and an associative binary operation on it such that there is an identity and all the set's elements have two-sided inverses?

Answer: group

[10] These are the groups of symmetries of regular polygons. For an n-gon, the group has 2n elements, which are composed of rotations and flips.

Answer: dihedral groups

[10] This theorem asserts that any finite group G of order n is isomorphic to a subgroup of the

symmetric group on n elements. Answer: <u>Cayley</u>'s Theorem

Pencil and paper ready. A stick of length one meter in its rest frame and mass one kilogram is moving at .8c relative to the earth. Fifteen points for each, what is its length and momentum in the earth's reference frame? Please express your answers in SI units; you have twenty seconds. Answers: length is <u>.6 meter</u>; momentum is <u>400 million kilogram meters per second</u> (prompt if right number but no units given, accept equivalents for numbers)

# [Literature]

Name the author from their last words for fifteen points, five if you need a well-known work. [15] "It is some time since I drank champagne."

[5] The Cherry Orchard

Answer: Anton Chekhov

[15] "I've had eighteen straight whiskeys. I think that's the record."

[5] "Do Not Go Gentle into that Good Night"

Answer: Dylan Thomas

For five for one, ten for two, fifteen for three, and thirty for all correct, name all four of the Bobbsey twins.

Answers: Bert, Nan, Flossie, and Freddie

Identify the following genres of medieval literature FTSNPE.

[5] Based on bible stories, these cyclical plays were originally performed in Latin but evolved into the vernacular. They were primarily concerned with man's creation, fall, and redemption. Answer: **Mystery plays** 

[10] Developing from the mystery plays, this form of religious drama dealt with the lives of the saints and the divine intervention of the Virgin Mary. Most surviving examples are in French.

Answer: Miracle plays

[15] For a change of pace, these salty tales mocked the clergy and denigrated women. The best-known English example is Chaucer's "The Miller's Tale."

Answer: Fabliaux

Name the John Donne poem from lines, FTPE.

[10] "The phoenix riddle hath more wit / By us; we two being one, are it"

Answer: The Canonization

[10] "Come live with me, and be my love / And we will some new pleasures prove / Of golden sands, and crystal brooks / With silken lines, and silver hooks."

Answer: The Bait

[10] "Take me to you, imprison me, for I / Except you enthrall me, shall never be free / Nor ever chaste, except you ravish me."

Answer: Holy Sonnet XIV (accept Batter my Heart)

# [History]

Identify the Nazi Party members, 5-10-15.

[5] This man became president of the Reichstag in 1932 and Reichsminister of the Air Force in 1933, a post he held until his death in 1946.

Answer: Hermann Goering

[10] He served as Chancellor of Germany for six months in 1932 and later became vice-chancellor and ambassador to Austria under Hitler.

Answer: Franz von Papen

[15] This man helped organize the S.A. and the S.S. and was instrumental in bringing war veterans into the Nazi Party before being purged by Hitler in 1934.

Answer: Ernst Roehm

FTPE answer the following questions about the Thirty Years' War.

[10] After the Holy Roman Emperor Ferdinand II tried to impose Catholicism on his Bohemian subjects, they offered their throne to this Calvinist ruler.

Answer: Frederick V (prompt on elector palatine or elector of the Palatinate)

[10] This November 1620 battle was the first significant engagement of the war. Frederick V's forces were severely defeated by the Holy Roman Empire and the Catholic League.

Answer: White Mountain

[10] This Bavarian general was the principal commander of the armies of the Catholic League. He was later responsible for the rape of Magdeburg.

Answer: Graf von Johann Tserclaes Tilly

Identify the American Secretary of State, FTPE.

[10] Secretary of State under Wilson, he resigned after 3 years during the Lusitania crisis due to his conflicting policies of neutrality during WWI.

Answer: William Jennings Bryan

[10] Secretary of State under Washington, and thus the first.

Answer: Thomas Jefferson

[10] He arranged with England for the joint occupation of the Oregon country, obtained from Spain the cession of the Floridas, and formulated, with his President, the Monroe Doctrine.

Answer: John Quincy Adams

[Current Events]

Canada had an election last November, too. Answer the following questions about it, FTSNP.

[20] The party that forms the government and the opposition party did not change, although they both picked up seats. FTPE, identify both parties.

Answers: Liberal party, Canadian Alliance

[10] This former ruling party only won 12 seats, just enough to maintain official party status in Parliament.

Answer: Progressive Conservative party

The old Soviet anthem has made a comeback, with different words, of course. Answer these questions about the Russian anthem, FTPE.

[10] Which 19th-century composer wrote the wordless "Patriotic Song," which Russia adopted after the Soviet collapse?

Answer: Mikhail Glinka

[10] Russia's national champions in this sport complained that the new anthem left them with nothing to sing loudly before games.

Answer: soccer (accept "real football")

[10] This retired politician strongly condemned Putin's plan to bring back the old anthem, saying "the president of a country should not blindly follow the mood of the people."

Answer: Boris Yeltsin

[Popular Culture and Sports]

For 15 PE, name these members of the Olympic champion US women's softball team.

[15] She plays shortstop, and in a spare time, this 34-year old is an orthopedic surgeon.

Answer: Dot Richardson

[15] After setting batting and home run records while winning the MVP in the Women's Professional Softball League, this shortstop won Olympic gold in Sydney.

Answer: Crystal Bustos

For the specified number of points, answer these questions about baseball in a certain city:

[5] In 1915, the club adopted this present name in honor of Lewis Sockalexis, a Native American from the Penobscot tribe in Maine.

Answer: Cleveland Indians

[10] The club adopted this name in 1889 because there were so many tall, skinny players on the team. Cy Young played for this team for eight years.

Answer: Cleveland Spiders

[15] The club adopted this short-lived name in 1900 because of the bright color of their

uniforms.

Answer: Cleveland Blues

5-10-15, name the Hitchcock movie from a brief plot description.

[5] Confined to bed, a photojournalist begins spying on his neighbors. The journalist becomes convinced that he saw a traveling salesman murder his wife.

Answer: Rear Window

[10] Tourists witness the killing of a Frenchman, who tells them a killing will take place at Albert Hall. To silence them, agents kidnap their child, who is of different sex in the original and the remake.

Answer: The Man Who Knew Too Much

[15] A scientist pretends to defect to East Germany to learn their missile secrets. Unfortunately, his secretary and fiancée follows him, making escape more difficult.

Answer: Torn Curtain

[Fine Arts]

Given the pieces identify the musical period from which they come FTPE.

[10] Ascension Oratorio and The Well-tempered Clavier

Answer: Baroque

[10] Tosca, Sheherazade, and Hungarian Rhapsodies

Answer: Romantic

[10] Cosi fan Tutte and Mass in C, "Missa Solemnis"

Answer: Classical

Answer the following questions about a movement in art, FTSNPE.

[10] Name the group of young romantic painters, poets, and writers that formed in 1848 in England to try to produce a more "genuine" art.

Answer: The Pre-Raphaelite Brotherhood

[5] Name the English painter of Italian descent who was a co-founder of the movement.

Answer: Dante Gabriel Rossetti

[15] Give the name of the Pre-Raphaelite magazine, which was founded in 1849, ran for four issues, and was subtitled "Thoughts Towards Arts and Poetry".

Answer: The Germ

30-20-10, name the composer.

[30] Born in Mons, Belgium, he was a professional choirboy as a child and was kidnapped three times because of his beautiful voice.

[20] In addition to the genre for which he is most famous, he also composed lieder, madrigals, chansons, and masses.

[10] He is most famed for his motets, including the Seven Penitential Psalms and the 12 Prophetiae Sibyllarum (Prophecies of the Sibyl).

Answer: Orlando di Lasso (accept Roland di Lassus)

[Religion/Mythology/Philosophy]

Given the iconography usually associated with a saint, give the saint, FTPE.

[10] This saint was said to have been blinded as part of her torture, which is why she is often shown carrying a dish with two eyes upon it.

Answer: St. Lucy of Syracuse (St. Lucia of Syracuse)

[10] This saint, responsible for the Vulgate translation of the Bible, is frequently represented with a lion.

Answer: St. Jerome

[10] This saint is usually shown with a grill, representing the method of his martyrdom. While burning, he is reported to have said, "Turn me over; I'm done on this side."

Answer: St. Lawrence (also accept St. Lorenzo or St. Laurentius)

Answer the following questions related to Arthurian legend FTSNPE.

[5] Name the Irish princess beloved of Tristan.

Answer: **Isolde** (accept also **Yseult**, **Iseult** or equivalents)

[10] Name the king of Cornwall to whom Isolde is to be married.

Answer: King Mark

[15] Name the maid of Isolde who gives Tristan and Isolde a love potion.

Answer: Brangane

[Social Sciences]

Name these anthropologists FTPE.

[10] A student of Franz Boaz at Barnard, she studied sex roles in the Arapesh, Mudugumor [muh-DOO-guh-more], and Tchambuli [t-cham-BOO-li] cultures of New Guinea.

Answer: Margaret Mead

[10] Better known as the father of French sociology, this man also influenced anthropology with his works "The Elementary Forms of Religious Life" and "Suicide".

Answer: Emile **Durkheim** 

[10] His books on the Nuer of the southern Sudan are thought to be one of the most complete ethnographies ever written. He helped found the School for Social Anthropology at Oxford.

Answer: Sir Edward Evan Evans-Pritchard

Name these mood disorders, 5-10-15.

[5] Formerly known as manic-depressive disorder, sufferers experience intense periods of elation interspersed with times of severely decreasing mood and activity.

Answer: Bipolar disorder

[10] Also known as affective personality disorder, sufferers experience mood swings unrelated to life events yet too mild to be classified as bipolar.

Answer: Cyclothymic disorder

[15] Sometimes referred to as neurotic depression or depressive personality disorder, suffers exhibit mild depressive symptoms too mild to cause a major depressive disorder.

Answer: **Dysthymic** disorder

# [Geography]

FTPE, identify the present-day African country, given a colonial name for the area it occupies.

[10] Congo Free State

Answer: Democratic Republic of the Congo (accept Congo - Kinshasa)

[10] Nyasaland Answer: Malawi [10] Basutoland Answer: Lesotho

## [Your Choice]

Identify the band from lyrics, 30-20-10.

[30] "Through the fish-eyed lens of tear-stained eyes, I can barely define the shape of this moment in time."

[20] "We're just two lost souls swimming in a fish bowl year after year."

[10] "All in all, you're just another brick in the wall."

Answer: Pink Floyd

Name the language, 30-20-10.

[30] This language has fifteen cases which can express place, time, ownership, manner, and other things for which English uses a preposition.

[20] This is a phonetic language, meaning that each letter in the alphabet corresponds to one phoneme, so every letter is always pronounced in the same way.

[10] Called "suomi" by its speakers, this is the native language of composer Jean Sibelius and Olympic athlete Paavo Nurmi.

Answer: Finnish

Name these terms from linear algebra FTPE.

[10] This type of n-by-n matrix only has non-zero values along the diagonal, and all values on the diagonal are equal.

Answer: scalar matrix

[10] This process is used to turn a basis of a vector space into an orthogonal basis.

Answer: **Gram-Schmidt** process (algorithm, method...)

[10] This is a square matrix whose its Hermitian transpose is the same as its inverse.

Answer: unitary matrix

# spares from Virginia Tech

Federal troops fought their way across the North Anna River at Telegraph Bridge and Jericho Mill, but Lee's counter prevented a joining of the lines and forced Grant and Meade to take another course. After crossing the Pamunkey River at Hanovertown, the Union Army seized a crossroads just ten miles from Richmond. For ten days, however, they were unable to push through and were forced to swing around to Petersburg. This ended, FTP, what July 1864 Civil War battle?

# **Cold Harbor**

He once said, "Salvation belongs to the Lord, everything else is my business." He acquired Swedish Pomerania by the Treaties of Stockholm and his Potsdam Guard gained fame since all of its soldiers were 6 feet or taller, but he is best known for his domestic reforms such as centralizing the government, instituting compulsory primary education, freeing the serfs and codifying German laws. FTP, name this second Prussian King, the father of Frederick the Great.

# Frederick Wilhelm I

[Note: This is so not Frederick I. Anyone who protests this should be shot.]

Developed by a mechanical engineer at the University of Chicago during the 1970's, this scale ranges from zero to six, but six is considered inconceivable. It was developed during a study connecting severe down drafts from thunderstorms with airplane crashes. FTP, name this most commonly used scale of tornado intensity.

Fujita Tornado Intensity Scale

Elected in 1990 on a platform of "Honest, Jobs and Technology," his former constituents now say that he left them with corruption, unemployment, and poverty. He showcased his authoritarian style for the world in 1997, when he personally directed a raid against Tupac Amaru hostage takers at the residence of the Japanese ambassador, slaughtering some 60 of them. FTP, name this South American leader, declared mentally unfit to rule in November, the former president of Peru.

Alberto Fujimori

### POPULAR CULTURE & SPORTS [4/4]

Born in Brooklyn, New York, he coached the now defunct Washington Capitols before moving to Boston. He had a habit of sitting among the fans during the game, and he waited until the Celtics were certain to win before lighting his cigar. Name this man who, FTP, coached the Celtics to eight consecutive championships and whose "most regular-season wins" career was recently surpassed by Lenny Wilkens.

Red Auerbach

### [FINE ARTS 3/3]

Highly influential in the school of Ferrara, from the 1460s, he worked predominately for the Gonzaga family of Mantua. For the Gonzaga family he produced the "Camera degli Sposi," on whose ceiling he decorated with the first *di sotto in su*, a style developed later by Corregio. While harsh sharp lines dominated his work, he often deviated from true perspective. Identify this northern Italian artist whose better known works include "Saint James led to Martyrdom" and "The Dead Christ."

Andrea Mantegna\_

# RELIGION/MYTHOLOGY/PHILOSOPHY [3/3]

Set to guard the Holy Peach Trees as punishment for disturbing \_all\_ the gods and their creations, he gave into the temptation to taste the Peaches. As new punishment, Buddha sent him to find the edge of the world, but this prankster never even made it off of Buddha's hand. FTP, who is this curious shape-changer, the main character in "Journey to the West"?

# Monkey or The Monkey King

# SOCIAL SCIENCES [2/2]

First published in 1689, this essay advanced empiricism, the theory that all knowledge is gained from experience. Despite the fact that many philosophers of the time believed in innatism, that some knowledge is inborn, this work had sufficient influence that George Berkeley and Gottfried Leibniz defined their own positions in relation to this work. FTP, name this essay by John Locke.

An \_Essay on Human Understanding\_

# GEOGRAPHY [1/1]

Located on the Western Duina River, it was founded by Bishop Albert I of Livonia. The home of the Doma Cathedral, and the site of the founding of the Brotherhood of the Sword, it was a major trade center in the Hanseatic League and was allowed autonomy though being conquered by the Swedes and the Poles. FTP, name this city which did not have the luxury of autonomy when it was conquered by the Soviets but became the capital of Latvia upon the dissolution of the Soviet Union.

Riga

# YOUR CHOICE [3/3]

The transverse version originated in China around 900 BC, and reached Europe as a military signaling device by 1100 AD. The current "standard" version is of the metal, cylindrical-bore transverse form created in 1847 by German instrument-maker Theobald Boehm. The standard concert class is more technically known as the "soprano" version of, FTP, what instrument, which ranges from large and unwieldy bass to the super-soprano piccolo.

\_Flute\_

San Diego has done it twice; New Orleans has done it eight times; Miami has done it seven times, and Minneapolis did it once. All of these cities, and more than a half dozen others, have hosted, FTP, what event, the championship game in professional football, whose 35<sup>th</sup> incarnation is being held this weekend in Tampa Bay?

The Super Bowl

"Nehaume" [neh-HOW-mah] literally translates as "Have you eaten yet?", but it has come to have a more generic meaning. Its usage stems from times of famine, when the first thing to do with a visitor was make certain he wouldn't starve to death at your door. FTP, what would English speakers say instead of the Mandarin "nehaume," when other language speakers might say "konnechiwa," "guten Tag," or "hola"?

Hello or any reasonable equivalent

For ten points each, identify these real-world imperfections.

[10] A system displaying this property does not transition from state A to state B at the same point as a move from state B to state A. Graphically, this results in a kind of "loop."

### Hysteresis

[10] This effect manifests when complex data is sampled below its Nyquist frequency. The frequency spectra overlap in the Fourier domain, causing false results in the time domain.

## Aliasing

[10] These may occur in asynchronous digital logic, or when a clock period is too short - a transiting signal with a false result is allowed to propagate before settling to its proper value.

Timing hazards\_

For 10 points each, answer the following questions about factors and people important to the development of the Industrial Revolution.

[10] Primarily British, it was championed by wealthy landlords in Parliament, it sought to create more efficient farms by combining small farms and forcing tenant farmers to give up their land.

# Enclosure Movement

[10] The opposite of the prior domestic system, it sought to group together expensive machined together close to convenient sources of power and centralize its workers in one place

The Factory System

[10] His Rocket, an improvement on Trevithick's locomotive, won a contest for fastest locomotive between Liverpool and Manchester.

George Stephenson

It was a group of African farmers of Dutch descent, whose leaders included Piet Retief and Andries Pretorius. FTPE....

[10] Give the term for those Dutchmen, a word that literally mean 'farmer'.

#### Boer

[10] Give the term for this migration of Boer settlers who left the Cape Colony to search for farmland and freedom from British control.

### the Great Trek

[10] FTP, or FFP within 5 years, in what year did the Great Trek begin? **1835** (5 for 1830-1840)

FTSNOP, given a year and a league, name the championship winner. Note: this is the season year, not necessarily the year the championship game was played.

[5] 1982 NFL

Washington Redskins

[10] 1943 ML Baseball

NY Yankees\_

[5] 1997 MLS

DC United

[10] 1971 NCAA football

Nebraska Cornhuskers or Huskers

Identify the movie from quotes FTSNOP.

[5] "Damn it Sam, you played it for her, play it for me!"

## Casablanca

[10] "Some things in here don't react too well to bullets."

# The Hunt for Red October

[5] "What would you prefer? Yellow spandex?"

#### X-Men

[10] "Here is your receipt for your husband, and this is my receipt for your receipt."

**Brazil** 

- 30-20-10, name the New Testament figure.
- 30: He drew his sword to defend Jesus when Jesus was arrested.
- 20: Roman Catholics consider him the first Pope, while Eastern Othodox
- 10: Most prominent of the 12 apostles, he denied three times that he was a follower of Jesus.

Peter or Simon Peter

Identify the "person", 30-20-10.

[30] He and his brothers married swan-princesses; his wife left him, and he was captured by King Nidud, maimed, and forced to create trinkets for the king's family.

[20] He killed Nidud's sons, making goblets from their skulls and jewels from their eyes. He fathered a child by Nidud's daughter and escaped.

[10] Legend has it that if your horse has lost a shoe, you can leave the animal and a silver coin on the capstone of his smithy, and the next morning you will find this Anglo-Saxon god of blacksmithing has re-shod your horse.

# **Wayland Smith**

Identify the following famous churches, FTPE.

[10] Built by Justinian in 537, it was a Christian church until 1453, when the Turks conquered Constantinople. They built 4 minarets at its corners, and converted it into a Mosque.

## Hagia Sophia

[10] Built in Florence over 150 years, almost every early Renaissance master contributed to its design, including Brunelleschi, Giotto, Pisano, and Donatello. It is famous for its white cupola.

## Duomo

[10] Named for the author of Revelation, this American cathedral is located in downtown Manhattan. Cathedral of St. John the Divine

### SPARES FROM MICHIGAN

About a gram of it is produced in the human body daily, but it has no known function. As an insoluble calcium salt it is found in gallstones. Produced mainly in the liver as the end product of hemoglobin breakdown, if the bile duct is obstructed it can be forced into the bloodstream with characteristic symptoms. For ten points, identify this pigment that imparts the familiar colors to both feces and jaundice.

ANSWER: bilirubin

Because he published most of his work in the Transactions of the Connecticut Philosophical Society, he was largely unknown during his lifetime and much of his work was rediscovered by others. His namesake rule relates the degrees of freedom of a system with its chemical constituents and its phases. For 10 points - identify this American chemist, also known for a type of free energy.

ANSWER: Josiah Willard \_Gibbs\_

Outliers are plotted individually. Whiskers extend from each end to the farthest non-outlier data points. Three lines represent the first, second and third quartiles. For ten points, what graphical data summary, named for the rectangles it contains, is being described?

ANSWER: boxplot

Some say that his impotence was caused at seeing his new wife's hairy genitals. Later, his wife left him for the painter John Everett Millais, with whom he had associated while working on his first book. Towards the end of his life he wrote two volumes of letters to the working class about economics, entitled "Time and Tide" and "Fors Clavigera", as well as his autobiography, "Praeterita". For ten points, identify this Victorian critic, author of "Modern Painters" and "The Seven Lamps of Architecture".

ANSWER: John \_Ruskin\_

A copy of "Timon of Athens" graces the door of a secret passageway in the palace at Onhava, a subtle allusion to the title of the book. The passageway led to the dressing room of the Royal Theater, where the actor Odon aided the king's escape. The narrator tells these stories of his native Zembla in order to coax a certain poet into including them in his final and greatest poem. For ten points, identify this work about the final poem of John Shade and his commentator, Charles Kinbote, written by Vladimir Nabokov.

ANSWER: \_Pale Fire\_

He gained fame while just a teenager, and his critical essays are rated alongside those of Schiller. His creative output is limited to his epic about Frederic the Great, the philosophical novel "Maia" and his short story refuting decadence, "A Man of Misery". Days before dying of cholera he composed an essay relating art and beauty to hedonism, which was inspired by his lust for a Polish boy. For ten points, identify this author, the silent lover of Tadzio and protagonist of Thomas Mann's "Death in Venice".

ANSWER: Gustav von Aschenbach

Abandoning the samurai way after the death of his master, his development of the "new style" moved his literary form away from dependence on gossip for an ethereal statement of Zen philosophy. Extremely adept at the renga form, he moved away from verbal tricks to tone and lyricism in linking verses. For ten points, identify this Japanese poet, master of the haiku.

ANSWER: Matsuo Basho or Matsuo Munefusa

He was originally a sharp critic of Abraham Lincoln, having been Attorney General in the Buchanan administration. In Lincoln's administration, he was the legal advisor of Simon Cameron, but replaced Cameron upon his resignation. A talented administrator, upon Lincoln's death he remained in his post to direct the demobilization. He favored harsher Reconstruction measures than President Johnson, but when Johnson attempted to remove him Johnson was impeached. FTP name this Secretary of War during the Civil War. ANSWER: Edwin \_Stanton\_

Born near Augsburg in 1885, he briefly taught elementary school. A veteran of World War I, he joined the German Socialist Party in Nuremberg, where he was later to be hanged. In 1922 he switched his allegiance over to the Nazi party and was rewarded a year later with the editorship of its primary newspaper. For ten points--name this infamous editor of "Der Sturmer".

ANSWER: Julius \_Streicher\_

A joint project of Boeing and Textron, 15 have been delivered so far at a cost estimated as high as \$80 million apiece. The program was cancelled in 1989 but resurrected under intense pressure from Congress. The US military plans to buy over 400 more, but the project has been plagued by design problems and political opposition. For ten points identify this tilt-rotor aircraft, 4 of which have crashed, claiming 30 lives. ANSWER: M\_V-22\_ Osprey\_ (either is acceptable)

In a sickening example of tragedy becoming farce, this man released an album of him singing popular songs, with the proceeds going to victims of violence in East Timor. While chief of his nation's armed forces, he did nothing to stop that violence, and his withdrawal of support if widely believed to have helped the downfall of Suharto. FTP identify this former Indonesian general and alleged war criminal.

ANSWER: \_Wiranto\_

Benefiting from the 1956 Hungarian Revolution, it signed superstar defector Ferenc Puskas, who joined the legendary Alfredo Di Stefano in leading this club to winning the first five European Cups. The winner of 27 Primera Liga titles, success returned with two Champions League titles in 1998 and 2000. FTP identify this Spanish soccer giant, the club of Luis Figo Raul and Roberto Carlos.

ANSWER: \_Real Madrid\_

Formed in Orange County in 1987, it first put out a line of volleyball shorts catering to the Southern California lifestyle. By the early 1990's, its revenue topped \$30 million as it clothed many supple young bodies. Interestingly, its namesake had attended high school with a designer who was already successful in milking the youth market, Shawn Stüssy. FTP name this clothing brand akin to Yaga and Fresh Jive, which like Stüssy, sports an autographic logo.

ANSWER: Mossimo

His most famous work was written for a public disputation which was denounced as heretical by Pope Innocent VIII. He attempted to flee to France but was imprisoned and then returned to Florence. There he wrote his other two well known works, an exposition of Genesis entitled "Heptaplus", and a synopsis of Plato and Aristotle, entitled "De Ente Et Uno", or "Of Being and Unity". FTP identify this Renaissance Platonic philosopher, who wrote "Oration on the Dignity of Man."

ANSWER: Pico Della \_Mirandola\_

By custom, on this holiday only dairy products are eaten. Another custom is called the Tikkun, where the devout stay up the night preceding the holiday and study sacred texts. The holiday is one of the main feast holidays of its religion, coming exactly 40 days after the previous one, which is counted off via the process of the Omer. FTP identify this holiday during which Jews celebrate the giving of the Torah, sometimes called the Feast of Weeks.

ANSWER: Shavuoth

This is a subfamily of the Uralic language family, and it is divided into two major groups. Some of the languages in this group, including Khanty and Mansi are spoken in the Ob River valley, while some others, including Mari and Mordvin, are spoken in the Volga region. Other languages include Karelian and the now defunct Livonian. FTPname this language group that includes Estonian, Magyar and Finnish.

ANSWER: \_Finno-Ugric\_

It will not make you look five pounds thinner. Green Acres, The Beverly Hillbillies and Hooterville Junction will no longer be so damned relevant and women will not care if Dick finally gets down with Jane on "Search for Tomorrow" because black people will be in the street looking for a brighter day. NBC will not be able to predict the winner at 8:32 or the count from 29 districts. It will not fight germs that cause bad breath. It will, however, put you in the driver's seat. It will be no re-run, brothers. It will be live. FTP identify the poem excerpted above, written by Gil Scott-Heron in 1975.

ANSWER: \_The Revolution Will Not Be Televised\_ (prompt on "The Revolution")

Proving the international popularity of its genre, it was a joint project by American and Japanese animators. Based on the comic by Masamune Shirow and directed by Mamoru Oshii, it posed existentialist questions about identity, memory, and technology in a Hong Kong-like dystopia. FTP identify this anime that enjoyed arthouse success during its 1996 U.S. release and features a perpetually naked female cyborg, Major Motoko Kusinagi.

ANSWER: \_Ghost in the Shell\_ or \_Kokaku kidotai\_

Its area of over 20,000 square miles makes it larger than nine states, and the largest county in the contiguous US. The county seat gives its name to the county; other cities include Barstow, Ontario, Twentynine Palms and Hinkley. FTP name this California county which stretches from the western suburbs of Los Angeles to the Nevada and Arizona borders.

ANSWER: \_San Bernardino\_ county

He left Italy to escape Mussolini's regime, and settled in Berkeley, where he developed methods for separating nuclear isomers by chemical means. He discovered the first manmade element, technetium, and later helped to discover the radioactive elements astatine and plutonium, which led to work on the Manhattan Project.

However, his most important discovery was a result of his development of the bevatron beam. FTP name this physicist, who won the Nobel Prize for the discovery of the anti-proton.

ANSWER: Emilio Segre

Its architect is buried in the crypt, with an inscription directing anyone seeking his monument to look around. Upstairs are buried General Cornwallis and Admiral Nelson. Its most notable literary resident is former dean John Donne, who only knew its predecessor that burned down in the Great Fire of 1666. FTPname this principal church of the City of London, the masterpiece of Sir Christopher Wren, with a dome bigger than any other church but St. Peter's.

ANSWER: Saint Paul's Cathedral

The name of this disease was coined in 1951 by Dr. Richard Asher. Most sufferers are solitary unemployed men and it may be linked to earlier emotional neglect, causing the patient to seek support and caring. It differs from hypochondria in that the patient deliberately fabricates illness and today its "proxy" variation is better known. FTPname this mental disorder named after a fictional baron.

ANSWER: Munchausen Syndrome (do not accept Munchausen by proxy)

Answer the following questions related to electronics, for 10 points each.

[10] This electronic device is created by selectively doping a semiconductor to produce transistors, capacitors and other basic electrical components all connected as part of a single unit.

ANSWER: \_integrated circuit\_ (or \_IC\_)

[10] This engineer shared the Nobel Prize for Physics in 2000, 42 years after his development of the integrated circuit in 1958.

ANSWER: Jack \_Kilby\_

[10] Kilby developed the integrated circuit while working for this company.

ANSWER: Texas Instruments

Answer the following questions related to eigenvalues for the stated number of points.

[10] For five points each, find the eigenvalues of the following matrix: first row [1,

4]; second row [0, 5].

ANSWERS: 1, 5 (eigenvalues of an upper triangular matrix are the diagonal elements.)

[10] This matrix property is equal to the product of the eigenvalues.

ANSWER: determinant

[10] A Hermitian matrix whose eigenvalues are all non-negative is referred to by this term.

ANSWER: \_positive semidefinite\_

Answer the following questions about a prominent female African American author, for ten points each. [10] Her career was marked by intellectual disputes with Langston Hughes and Richard Wright over her depiction of black folk customs and attention to gender disputes among blacks.

ANSWER: Zora Neale \_Hurston\_

[10] This Hurston novel chronicles Janie's quest for happiness, which ends in tragedy after her third husband Tea Cake dies in the Everglades following a hurricane.

ANSWER: \_Their Eyes Were Watching God\_

[10] The most autobiographical and first of Hurston's novels, this work details the struggles of the self-destructive preacher John.

ANSWER: \_Jonah's Gourd Vine\_

Identify some things about a novel, for the stated number of points:

[5] Identify the novel in which Dr. Aziz is falsely accused of a crime, and though exonerated with the help of Adela Quested, develops an intense resentment of colonial rule.

ANSWER: A Passage to India

[10] He is the British District Manager to whom Adela is engaged during most of the novel.

ANSWER: Ronny \_Heaslop\_

[15] Give the name of the fictional Indian town where most of the action of the novel takes place.

ANSWER: Chandrapore

Given a description of a sonnet cycle and its author, name the cycle for ten points each.

[10] Shocking for the intimate detail it provided about the inner life of its prominent and respected author, Sir Philip Sidney, this cycle recounts the psychological and social consequences of love, with many hidden references to Elizabethan court life.

ANSWER: \_Astrophil and Stella\_

[10] Written by John Donne after leaving the Catholic church, this series of sonnets contemplates man's relationship to God and the psychological aspects of faith.

ANSWER: \_Holy Sonnets\_

[10] Unusual for their depiction of a happy and successful courtship, this cycle by Edmund Spenser saw the development of the author's eponymous form of the sonnet.

ANSWER: \_Amoretti\_

Identify the author from works, 30-20-10

[30] poetry collections "Anacreon's Grave" and "Divan of East and West"

[20] the autobiography "Poetry and Truth"; the novel "Elective Affinities"

[10] "Torquato Tasso"; "Wilhelm Meister's Apprenticeship"

ANSWER: Johann Wolfgang von Goethe

Identify these works of Emile Zola, for ten points each:

[10] This is the name of Zola's extended series of 20 books, depicting the lives of each member of a French family.

[10] Widely considered Zola's masterpiece, it depicts life in a mining community, and the struggles between social classes.

ANSWER: Germinal

[10] This novel depicts the effects of alcoholism in a working class neighborhood by focusing on the rise and decline of the laundress Gervaise Macquart.

ANSWER: The \_Drunkard\_

# [check re breyer]

Louis Brandeis was the first Jewish justice on the US Supreme Court, and Ruth Bader Ginsburg is the most recent. Name the other 4 Jews who served on the Court; 5 points for 1, 10 points for 2, 20 points for 3, 30 points for all 4.

ANSWER: Benjamin \_Cardozo\_, Felix \_Frankfurter\_, Arthur \_Goldberg\_, Abe \_Fortas\_

Name these Napoleonic battles from descriptions, for 10 points each:

[10] The September 1812 victory that allowed Napoleon to take Moscow.

ANSWER: \_Borodino\_

[10] His 1807 victory over the Russians near Koenigsberg that forced the Czar to sign the treaty of Tilsit.

ANSWER: \_Friedland\_

[10] After an initial defeat, Napoleon made a counter-attack against his slow Austrian pursuers at this June 1800 battle where he defeated General Melas and won most of Lombardy.

ANSWER: \_Marengo\_

Given a country, a monarch and the year of his death, name the dynasty that ended with that event, for the stated number of points:

[5] India, Bahadur Shah II, 1862 ANSWER: Mughal or Moghul [10] Spain, Carlos II, 1700

ANSWER: Spanish \_Habsburgs\_ [15] Byzantium, Justinian II, 711

ANSWER: Heraclian or Heraclid

Identify the following record labels for the stated number of points.

[5] Currently featuring artists like Jay-Z and DMX, this legendary label founded by Russell Simmons was the home to early rap pioneers like Run DMC and LL Cool J.

ANSWER: Def Jam

[10] This southern label produces absurdly materialistic, yet highly danceable music. Juvenile, BG, Lil' Wayne, and the Big Tymers comprise its namesake "Millionaires" collective.

ANSWER: \_Cash Money\_

[15] This independent label has kept a high profile with its "Soundbombing" and "Lyricist Lounge" compilations as well as LP's from Mos Def, Company Flow, and Reflection Eternal.

ANSWER: Rawkus

Identify the following John Sayles films for ten points each.

[10] This 1987 film about a 1920s West Virginia coal strike features Chris Cooper and James Earl Jones.

ANSWER: Matewan

[10] This 1988 film stars John Cusack as Buck Weaver, John Mahoney as the team manager and D. B. Sweeney as Shoeless Joe Jackson.

ANSWER: \_Eight Men Out\_

[10] This 1996 film stars Chris Cooper as a sheriff of a Texas border town who suspects his late father of the forty year old murder of a previous sheriff.

ANSWER: Lone Star

This is your bonus on Montgomery Clift. First, for 10 points each, given three other stars of one of Clift's films and an additional clue, name the film.

[10] Frank Sinatra, Burt Lancaster, Deborah Kerr; based on a war novel by James Jones.

ANSWER: \_From Here to Eternity\_

[10] Clark Gable, Marilyn Monroe, Eli Wallach; set in Nevada with a screenplay by Arthur Miller

ANSWER: The Misfits

[10] For a final 10 points, name either one of the characters Clift played in those two films.

ANSWER: Robert E. Lee Prewitt (From Here to Eternity), Perce Howland (The Misfits)

Identify the philosopher from clues, 30-20-10.

[30] wrote "The Nature of Judgment" and "Commonplace Book, 1919-1953"

[20] Edited the journal Mind, wrote "The Refutation of Idealism"

[10] was a leading figure in the Bloomsbury Group, authored "Principia Ethica"

ANSWER: G.(eorge) E.(dward) Moore

Identify the authors of the following seminal works of Twentieth Century economics, for ten points each.

[10] "The Road to Serfdom"

ANSWER: Friedrich August von Hayek

[10] "On the Economic Consequences of the Peace"

ANSWER: John Maynard Keynes

[10] "The Affluent Society"

ANSWER: John Kenneth Galbraith

Identify the world capitals through which each of the following rivers flows, for the stated number of points.

[5] Dnieper

ANSWER: Kiev (or Kyiv)

[10] Manzanares ANSWER: Madrid [15] Magdalena ANSWER: Bogota

Let's keep it clean and come out boxing! Identify the following pugilists from the classic NES game "Mike Tyson's Punch Out!!" based on their country of origin for ten points each.

[10] Spain

ANSWER: Don Flamenco

[10] Turkey

ANSWER: Bald Bull

[10] Germany

ANSWER: Von Kaiser

Identify the following buzzwords and catchphrases from cultural studies for ten points each.

[10] First elucidated by Thomas Kuhn, this refers to the establishment of new scientific worldviews following the exposure of the inadequacies of previous ones.

ANSWER: \_paradigm shift\_

[10] Propagated by Judith Butler, it posits that identities are fluid and to analyze a whole group based on one characteristic, such as gender or sexuality, is wrong.

ANSWER: \_queer theory\_

[10] This brand of literary criticism initiated by Jacques Derrida interprets texts based on cultural and philosophical implications of their language rather than authorial intent.

ANSWER: \_deconstruction\_

Identify the city, 30-20-10

[30] It was renamed Dzhokar-Ghala in honor of its assassinated leader. Its residents jokingly called the city by the name "Dirty," though its real name means "Formidable."

[20] It was founded in 1818 by Russian general Alexei Yermolov as a fortress just north of the main Caucasus range.

[10] It is the capital of Chechnya.

ANSWER: Grozny

#### SPARES FROM DARTMOUTH

3. The pioneering of binary division by James Roberts, Unix's license number one from Bell Labs, the first journal article in the social sciences involving a computer, the treatment of microchips with deuterium, the development of Path Pascal, the completion of ORDVAC, the introduction of Eudora, the solution to the four color problem, and the invention of Mosaic are all developments in computer science that occurred at FTP, which academic institution?

The University of \_Illinois\_ at Urbana-Champaign

5. Cellular motors such as myosin and kenesin are connected with this part and control its structure through direct bundling and alignment of filaments. Unique to eukaryotic cells, it is made up of long fibers that are polymers of subunits. FTP, name this "invisible" strucuture, often left out of cellular drawings that keeps up the cellular shape and placement and controls cell movement.

cytoskeletons

2. For ten points each, given a name for an aromatic compound give its more common name

Benzenol

phenol

Methylbenzene

\_toluene\_ Benzenecarboxylic Acid benzoic acid

- 4. Who likes math? Don't worry, you don't need a pencil and paper here. For the stated number of points, name the mathematicians associated with the following breakthroughs.
- 1) For five points, the binomial series.

A: Isaac Newton

2) FTP logarithms.

A: John Napier\_

3) For fifteen points, the number zero.

A: \_Sridhara\_

1. One of the seminal works on the treatment of women in the 19th Century, the title character is a young Creole girl who is married to the honest and demanding Colonel Dumare, but yearns for a better life with the dashing Raymon. Raymon rejects her, the Colonel dies and she eventually commits suicide with her cousin Ralph with whom she is now in love. FTP, name this 1832 novel by George Sand which has nothing to do with the U.S. state established 17 years earlier.

Indiana

- 2. Born in 1948, he earned a music degree from SUNY Potsdam and taught high school for several years before discovering his talent for writing. After earning a doctorate in British literature from the University of Iowa, he published his first collection of short stories, *Descent of Man* in 1979. A new short story collection entitled "After the Plague" is due next fall, while his newest novel, *A Friend of the Earth*, was published in 2000. FTP name this man who may be most famous for his novel *The Road to Wellville*.
- T. Coraghessan (or T.C.) \_Boyle\_
- 4. When told of his death, Jack Kerouac supposedly replied, "It's just a trick. He's hiding out someplace, like Tangier." A barber by training, he ended up working as a railway brakeman. His only work *The First Third* was published after his 1968 death from a drug overdose, soon after he had parted ways with Ken Kesey and the Merry Pranksters, FTP, name this Beat figure, the basis for the character Dean Moriarty in Kerouac's *On the Road*.

Neal \_Cassady\_

1. 30, 20, 10: Name the author from titles.

30- Riding the Iron Rooster, Waldo

20- The Kingdom by the Sea, Kowloon Tong: The Last Days of Hong Kong

10- The Mosquito Coast, The Great Railway Bazaar

Paul Theroux [The-ROO]

3. Answer the following trilogy of questions concerning literary trilogies for the stated number of points. FTP, Name the trilogy of tragic dramas by Aeschylus, first performed in 458 BC and Aeschylus's last work. The **ORESTEIA** 

For five points, all or nothing, give the three components of J.R.R. Tolkien's Lord of the Rings.

THE \_FELLOWSHIP OF THE RING\_, THE \_TWO TOWERS\_, and THE \_RETURN OF THE KING\_. For fifteen points, name the Canadian author of the Deptford trilogy, consisting of Fifth Business, The Manticore, and World of Wonders.

William Robertson \_ Davies\_

4. Name the following characters from Goethe's Faust for the stated number of points For five points, the woman Faust loves

\_Gretchen\_ (Magareta)

FTP Faust's best student and companion

Wagner

For fifteen points, Gretchen's brother, a soldier who duels Faust

Valentine

5. Given a description of a Middle Eastern writer, neither of which is Salman Rushdie, name him for fifteen points each.

An Egyptian civil servant for 37 years, he was awarded the 1988 Nobel Prize for Literature for books like The Children of Gebelawi and The Cairo Trilogy.

Naguib \_Mahfouz\_

Born in 1903, this Iranian composed several collections of short stories as well as the novella The Blind Owl. He committed suicide in 1951.

Sadeq \_Hedayat\_

1. Claiming the mark of civilization was to "cultivate the ground, live in houses, ride in Studebaker wagons, send children to school, drink whiskey, and own property", proponents of this 1887 Act claimed they were trying to protect the Native tribes from increased pioneer settlement. But even at its repudiation in 1924, it was viewed as one of the main causes of Native marginalization in America. FTP, name this piece of legislation, the origin of the American system of Indian Reservations.

\_Dawes\_ Severalty Act [proposed by Massachusetts Congressman Henry Dawes]

2. Though the original name of this paper was Social Insurance and Allied Services, it is better know today by its author. Despite having lost its government backing for being too radical, it was a public sensation. Among its recommendations was a national health insurance, unemployment insurance, old-age pensions and providing jobs for all. FTP, name this paper released in November of 1942, that detailed a plan for a post-war Welfare state in Britain.

The \_Beveridge\_Report

1. FTP each, answer these questions about Balkan history

Give the name of the decisive 1389 battle fought on "a field of Blackbirds" between the Turks and Serbs in which both the Serbian King Lazar and Turkish Sultan Murad were killed.

A: The Battle of Kosovo ( Polje )

The Queen Milica of Serbia was the only woman ever to set foot on this 1,600 year old complex of monasteries on the Halkidiki peninsula, the third holiest site of the Eastern Orthodox Church.

A: \_Mouth Athos\_ [also accept \_Great Lavra\_ or \_Chilander\_]

The Turks were to conquer all of the Balkans and indeed large areas of Austria-Hungary over the next few centuries. They were finally defeated at Vienna by which Polish king?

A: John (Jan) Sobieski

3. Answer these questions about the Romanov dynasty in Russia for the stated number of points:

First, for five, within twenty years, how long was the Romanov's reign?

\_304\_ years (accept 284-324)

For fifteen points, who was the first Romanov czar?

Mikhail Feodorovich

FTP what czar ruled as a co-czar between 1682 and 1689 with Ivan V?

\_Peter I\_ or \_Peter the Great\_

4. Answer these questions about events and people surrounding the Arab-Israeli Six Days War for ten points each.

In May of 1967, the Egyptians requested that this peacekeeping body be withdrawn, which it was. What was the name of that military oversight group?

UNEF or United Nations Emergency Force

One of the central battlegrounds in the war was the strait between the Gulf of Aqaba and the Red Sea, that Egypt closed to Israel shipping. For fifteen points, name it.

Strait of Tiran

For a final ten points, who was the Prime Minister of Israel during the War?

Levi Eshkol

1. For ten points each, answer the following questions about Ralph Nader and the Green Party.

First, The name of Nader's running mate in the 2000 Presidential election.

Winona LaDuke

Second, According to Nader, who "cost him the election."

Al Gore

The all-encompassing term of contempt that the Green Party uses to describe both major political parties, implying the two parties are one and the same.

Republicrats

2. Answer these questions about the current trial of two Libyans on charges of bombing Pan Am Flight 103, for the stated number of points.

For fifteen points, name either of the two defendants in the trial

Al-Amin Khalifah \_Fhimah \_ or Abdel Basset \_el-Magrahi \_

For five points, name the country where the trial is currently taking place.

The Netherlands\_

For a final ten points, the prosecution alleges that the defendants placed the bomb aboard a Libyan Arab Airlines plane in what country's Luqa airport?

\_Malta\_

2. Given some of the teams involved, name the soccer league or competition in which they are playing in 2000-2001, for ten points each.

Bradford City, Tottenham Hotspur, Liverpool, Arsenal

\_English Premier\_ League (prompt on Premier as there is Scottish as well)

Panthanaikos, AC Milan, Manchester United, Leeds United

European \_Champions\_ League

Glasgow Rangers, VFB Stuttgart, Bayer Leverkusen, Barcelona

\_UEFA Cup\_ (could be pronounced You-a-fa)

- 3. Given an NHL defenseman, tell how many times each has won the Norris Trophy given each year to the best defenseman in the league. 10 points if you're right, 5 if you're off by one.
- 1) Ray Bourque

A: Five

2) Bobby Orr

A: Eight

3) Chris Chelios

A: Three

4. 30-20-10, Identify the show from clues

For 30, It debuted in 1928 on WMAQ with Freeman Gosden and Charles Correll playing the main roles.

For 20, It remained on NBC's national radio lineup until the mid 1950's and inspired a television show which ran from 1951 to 1953.

For 10, Controversial for its subject matter, most of the actors on the television show were different than the radio performers, mainly because the radio performers were almost all white.

Amos n' Andy

- 3. It was traditionally performed the Friday before Palm Sunday and September 15<sup>th</sup> in the Roman Catholic church, though its use is now optional. It was written by a 13th century Franciscan Monk as a prayer, and has since been set to music by over 500 composers. FTP name this work, set to music by such composers as Schubert, Rossini, Verdi, and Poulenc, that commemorates the Virgin Mary at the crucifixion of Christ. A: Stabat Mater Dolorosa
- 3. Pencil and Paper ready. Put the following Gilbert and Sullivan operettas in the order that they first debuted. 5 points each for the correct order, with a five point bonus for all correct. The Pirates of Penzance, The Grand Duke, The Mikado, H.M.S. Pinafore, The Gondoliers A: H.M.S. Pinafore (1878), The Pirates of Penzance (1880), The Mikado (1885), The Gondoliers (1889), The Grand Duke (1896)
- 1. According to east-Slavic mythology, their laughter can kill humans and they can be found in meadows and other open places during new moons. The victims of man's unfaithfulness and condemned to eternal torment, they are the souls of murdered girls who now try and drown men by luring them into their lake. FTP, name these nymphs, the basis for Hans Christian Andersen's The Little Mermaid and the title of an opera by Antonin Dvorak.

Rusalki or Rusalka

3. Strictly speaking, it is the totality of religious, political, social, domestic, and private life in Islam. Based on the will of God it cannot be proven wrong, so humans are left to interpret it through a process know as figh (feek) exercised in religious courts. Much more important in family law, its criminal side is followed most closely today by Saudi Arabia. FTP, name this Islamic form of law based mainly on the Koran and the hadiths (hadeeths).

Shari'a\_ (Shareea).

1. Five points for one, ten for two, twenty for three, or thirty for all four, given a name say if that name has ever been the name of a Pope.

Linus Yes\_ Thomas No

Eugene \_Yes\_ Martin Yes

30-20-10, Name the epic from clues

For 30, It contains scenes from Burgundy, Iceland, and Hungary where there is a battle with Huns.

For 20, Notable characters include Werbel, Swemmel, Gelpfrat, and Dancwart

For 10, The story includes Gunther winning the hand of Brunhild and the doings of the warrior Siegfried.

The Nibelungenlied or The Song of the Nibelung

3. Given a list of philosophers, name the philosophical idea they all subscribe to FTP each.

Gabriel Marcel, Karl Jaspers, Martin Heidegger existentialism

William of Ockham, Francis Bacon, John Locke

empiricism

Victor Kraft, Rudolf Carnap, Moritz Schlick \_logical positivism\_

1. His 1933 \_Theory of Unemployment\_ was the main target of John Maynard Keynes' \_General Theory of Employment Interest and Money\_. His theories conclude that governments can, through taxes and subsidies, correct for market failure, and 'internalize the externalities'. His namesake tax is levied on negative externalities exactly equal to the marginal damage inflicted at the efficient level of output. FTP, identify this creator of welfare economics.

ALFRED CECIL (A.C.) \_PIGOU\_

1. Death and taxes. And more taxes. For five points per answer, answer these questions about state income taxes.

First, identify the three states which have income tax rates that exceed 9% in the highest bracket, all of which are west of the Mississippi.

\_CALIFORNIA\_ (9.3%), \_MONTANA\_ (11%), \_NORTH DAKOTA\_ (12%)

Taxachusetts has a relatively low 5.9% rate on most income, which will soon be falling to 5%. But, Massachusetts gouges its residents with a 12% tax rate on most of what type of income? SHORT-TERM CAPITAL GAINS

Seven states have no income tax at all. But that's not important right now. Name the two states that tax only interest and dividends, rather than wages and salaries.

NEW HAMPSHIRE and TENNESSEE

- 2. Located on Cape Ann this town and its residents provided the inspiration for the poem "The Wreck of the Hesperus" by Henry Wadsworth Longfellow. Touting itself as "America's oldest seaport", the town was established in 1623 and is home to many hundreds of deep-sea fishermen. FTP, name this historically-rich Massachusetts seacoast town, home to the characters in the movie "The Perfect Storm." Gloucester, Massachusetts
- 3. On June 4, this pitcher picked up a 15-5 win against the New York Mets, allowing 4 runs in 5 innings. In the second inning, he homered off Bobby J. Jones, then didn't get another at-bat all year. As a result, he became only the third player in major league history to earn a perfect 5.000 OPS, on-base percentage plus slugging, for the season. FTP, identify this Tampa Bay pitcher, whose name is 13th on the reverse-alphabetical list of major leaguers.

ESTEBAN YAN\_

1. Answer these questions about the following flag oddities, for the stated number of points.

Five points each, identify the only two countries whose flags are exactly the same. One is European, the other is Asian.

\_Monaco\_ and \_Indonesia\_

FTP which country features a different design on each side of its flag? One side shows the seal of the treasury and the other, the seal of the republic.

Paraguay

For another ten points, the flag of which mountain nation is the only one with a non-rectangular shape? \_Nepal\_

2. Now that we've all heard enough about the election in the news, let's bring it into academic competition. For 10 points each, name this type of ballot punch-out (or-not-quite punched-out).

A chad that can be counted if daylight is spotted when the ballot is held up to the light.

\_Sunlit\_ chad

A chad that is hanging from three corners.

\_Tri-chad\_ or \_Triangle\_ chad

A chad that is clearly attacked by the stylus but has not been properly pushed through, which retains the shape of the head of the stylus (not to be confused with a pregnant chad).

\_Dimpled\_ chad

- 3. For ten points each, given a U.S. president, name his zodiac sign.
- 1) Abraham Lincoln

A: \_Aquarius\_

2) Ronald Reagan

A: \_Aquarius\_

3) Woodrow Wilson

A: Capricorn

### SPARES FROM CASE WESTERN

Using radioactive probes to detect specific RNA fragments that have been separated by gel electrophoresis, this technique is frequently used in studies of gene expression, for example to determine whether specific mRNAs are present in different cell types. FTP name this variation of a technique developed by E. M. Southern.

ANSWER: Northern Blot

The reaction is run in the presence of concentrated alkali. Typically, aldehydes containing no alpha hydrogens undergo self-oxidation and reduction, and then a hydride shift. A mixture of an alcohol and a salt of a carboxylic acid result. FTP name this reaction named after its discoverer, a Polish chemist.

ANSWER: Cannizzaro reaction

Within a year after it was posed by John Bernoulli in 1696, John and James Bernoulli, Newton, and Leibniz had separately solved it. The amazing part of the solution is that a particle starting at rest on the solution curve takes the same amount of time to reach a given point from any point on the curve. FTP name this problem whose solution is an inverted cycloid, which sought the path down which a particle would slide in the shortest amount of time.

ANSWER: Brachistochrone

Identify the following vectors used in recombinant DNA technology FTP each:

[10] These are small, circular DNA molecules that can replicate independently in bacteria such as E. coli.

ANSWER: Plasmid

[10] This is a vector that can replicate as a chromosome in yeast cells and can accommodate very large DNA inserts.

ANSWER: YAC or Yeast Artificial Chromosome

[10] A vector containing bacteriophage lambda sequences, antibiotic resistance sequences, and an origin of replication. It also accommodates large DNA sequences.

ANSWER: Cosmid

Identify the following benzene derivatives from a given description for FTP each:

[10] A benzene ring bound to an amine group

Aniline

[10] A benzene ring bound to another benzene ring.

**Napthalene** 

[10] A benzene ring bound to an OH group

Phenol

Name the mathematicians from clues FTP each.

[10] This man gave us the modern definition of a function. His eponymous function is f of x equals 0 if x is rational, or 1 if x is irrational.

ANSWER: Peter Gustav Dirichlet

[10] Name either of the young mathematicians who independently proved in the early nineteenth century that it is impossible to solve a general fifth or higher degree polynomial equation by radicals.

ANSWER: Niels Henrik Abel or Evariste Galois

[10] This man became the first to calculate the arc length of the arch of a cycloid when he did so in 1658. He was an architect as well as a mathematician, and rebuilt St. Paul's Cathedral after it burned down.

ANSWER: Christopher Wren

Answer these questions about light for ten points each.

[10] When incident white light is refracted into component visible colors through a prism, this color bends the least from the prism.

ANSWER: Red

[10] Clouds are white because of the Mie version, and the sky is blue because of the Rayleigh version of this phenomenon of light.

ANSWER: Scattering

[10] This four-syllable adjective applies to the perception of sun rays converging towards the horizon at twilight or at dawn.

ANSWER: Crepuscular

Name these physiological terms from definitions for ten points each.

[10] This adjective describes the period of ventricular relaxation, corresponding to a minimum in blood pressure.

ANSWER: Diastole (Diastolic)

[10] The volume of blood pumped by each ventricle per minute, not the total by both ventricles, it is the product of heart rate and stroke volume.

ANSWER: Cardiac output

[10] The maximum volume of air a person can expire after maximal inspiration, it is the total lung capacity minus the residual volume.

ANSWER: Vital capacity

Born into a large family in Edo in the final year of feudal rule in Japan, he initially studied Chinese but was persuaded to pursue English literature. Upon graduation in 1895, he accepted a teaching position at a rural school, an experience that later served as the basis for the novel *Botchan*. FTP name this Japanese author of the *Asahi Shimbun* Trilogy, perhaps most famous for the work *Wagahai wa Neko de aru* or *The Cat*.

ANSWER: Natsume Soseki

Made into an opera by the German-American composer Kurt Weill, its follow up was the novel *Too Late the Phalarope*. The work concerns the deeply moving story of the Zulu pastor Stephen Kumalo and his son Absalom, set against the background of a land and people given by racial injustice. FTP name this novel, highly critical of apartheid, the best-known work by Alan Paton.

ANSWER: Cry, The Beloved Country

For ten points each, identify the following works written by Sinclair Lewis.

[10] Published in 1914, this was Lewis' first novel

ANSWER: Mr. Wrenn: The Romantic Adventures of a Gentleman

[10] Set in the city of Zenith, this book sees the title character, a realtor, come to resent the middle-class trappings that he has worked so hard to acquire.

ANSWER: Babbitt

[10] This 1935 novel sees a dictator elected as president of the United States. The hero, of the novel, Doremus Jessup, fights the censorship of his paper, and ends up in a concentration camp.

ANSWER: It Can't Happen Here

Given a nation, identify its national epic FTSNOP

[5] Spain The legend of the Cid (El Cid)

[5] France The Song of (Chanson de) Roland

[10] Finland The <u>Kalevala</u> [10] India <u>Mahabharata</u>

Given works composing a trilogy, give the name of the Trilogy FTP:

[10] Agamemnon, Choephoroi (The Libation Bearers), Eumenides

ANSWER: Oresteia

[10] Man of Property, To Let, In Chancery

ANSWER: Forsyte Saga

[10] The Octopus, The Pit, Wolf ANSWER: Epic of the Wheat

Prince Albert proposed a contest to design this building, and 233 entries were accepted. The winner was Joseph Paxton, and the building was erected in a mere six months. Inside it housed categories of things like raw materials, machinery, and miscellaneous items for a "Great Exhibition of the Works of All Nations." FTP name this building made of 330 massive iron columns, 24 miles of gutters, and 293, 655 panes of glass.

ANSWER: Crystal Palace

Ulysses Grant commented in his personal memoirs that the attack he ordered at this battle was the only one he wished he never would have ordered. In a mere half hour of fighting during the morning of June 3, 1864, the Union suffered 7,000 casualties. FTP name this somewhat misnamed battle, since there was 90-degree heat and no bodies of water nearby when it was fought.

ANSWER: Cold Harbor

Identify the following personalities from the Wars of the Roses on a 5-10-15 basis.

[5] He was the loser at the battle of Bosworth Field.
