Questions by Chris, Katie, and Jason (who is not affiliated with quizbowl)

Tossups

1.) In 1933 he went to Germany to defend the alleged burners of the Reichstag. Earlier, acting as the poor man's Clarence Darrow, he had appeared on the side of the defense for the *American Mercury* censorship case, the Scopes trial, the Sweet segregation-violence case, the Scottsboro case, and, perhaps most famously, the Sacco-Vanzetti case. For ten points, name this American lawyer who defended, usually without charge, persons accused in many prominent civil-liberties cases in the 1920s.

ANSWER: Arthur Garfield Hays

2.) It was commissioned by Lorenzo the Magnificent as the wedding present offered to his cousin Lorenzo di Pierfrancesco dei Medici, who married in 1482. The figures are all mythological and are identified as, from right to left: Zephyr embraces gossamer-clad Clori, a nymph, who is in the process of transforming into Flora, the goddess of Fecundity, as the flowers on her breath show. The central figure is Venus, and above her is Cupid straining a dart to the dancing three Graces, while Mercury, on the far left, raises the caduceo to the clouds. For ten points, name this Botticelli masterpiece.

ANSWER: La Primavera or The Allegory of Spring

3.) Used to construct the contract curve, which is the set of all Pareto optimal allocations, it is drawn on two axes and consists of two indifference curves one convex to each axis. A graph with quantities of available goods as dimensions FTP name this analytical tool that is named for a British economist and used to study the behavior of two economic agents based on preferences for goods and services when production of those goods is held constant.

Answer: Edgeworth Box

4.) Laura Fairlie, an English heiress, closely resembles Anne Catherick, a mysterious woman confined to a lunatic asylum. In order to secure Laura's money for himself, the villainous Sir Percival Glyde places her in the asylum in place of the dying Anne, but this treachery is exposed in the end by her faithful beau Walter Hartright, who saves her from both Sir Percival Glyde and other mysterious villain Count Fosco. For ten points, name this Wilkie Collins novel, which first appeared in 1860 in Dickens' *All the Year Round*.

ANSWER: The Woman in White

5.) The lead-acid reaction used in batteries; nickel plus two silver ions becomes Ni^{2+} plus 2Ag ; zinc plus two protons reacts to form Zn^{2+} and hydrogen gas; electrolysis; the corrosion of iron. FTP, identify this process, the movement of whose electrons is memorialized by Leo the lion growling.

ANSWER: Redox or Reduction-Oxidation reactions

6.) In 1617 Roman Catholic officials closed Protestant chapels in Broumov and Hrob, violating guarantees of religious liberty laid down in the Letter of Majesty. In response, the appointees to safeguard Protestant rights called an assembly at Prague, where imperial regents William Slavata and Jaroslav Martinic were found guilty of violating the Letter of Majesty. For ten points, these events led to what May 23, 1618 event in which Slavata, Martinic and their secretary were thrown from the windows of Prague Castle?

ANSWER: the **Defenestration of Prague**

7.) It works by insuring that every node's subtrees differ in height by no more than one. This data structure uses single and double rotations to rebalance the tree after every insert and delete. FTP, name this algorithm that requires $O(\log n)$ time.

ANSWER: **Adelson-Velskii-Landis Tree** (accept "AVL criterion" on first sentence)

8.) In this Arthurian Romance, our titular hero sets off to avenge his cousin at the enchanted fountain and ends up killing fair Laudine's husband, so he marries her and takes over the task of guarding the fountain. Not content with a quiet life, he goes off questing, forgets to come back, and ends up mad in the woods. Eventually he becomes the Knight With the Lion and wins his lady fair back. For ten points, name this Romance, which was written in different versions by Chretien de Troyes and Hartmann von Aue.

ANSWER: **Yvain** or **Iwein**

9.) In its afterward, Tolstoy proposed total abstinence as an ideal, the culmination of the extreme Christianity which characterized his later years. It is the dark story of a man who takes the Bible verse "But I say unto you, that everyone that looketh on a woman to lust after her hath committed adultery with her already in his heart" to heart and accuses his wife of adultery with the violinist Trukhachevskii and, although she is innocent, kills her. For ten points, name this 1891 novella that prominently features a Beethoven sonata.

ANSWER: The **Kreutzer Sonata**

10.) Barium Titanate, Rochelle Salt, and Potassium Niobate are crystals that exhibit this property, in which their dielectric constants can become enormous near their Curie temperature. FTP, name this property of crystals characterized by a permanent spontaneous electric polarization, whose name draws an analogy to materials with spontaneous magnetic moments.

Answer: **ferroelectricity**

11.) This structure exists in all plants, but exists in two different forms. Sieve tube members in angiosperms and sieve cells in most gymnosperms. Sieve plates accompany sieve tube members but are not found in sieve cells. Recent studies indicate the mRNA travels through these systems to reach many parts of a plant, creating new possibilities for grafting genetically modified plants. For ten points, name the system that uses pressure differentials to carry food from the leaves through to the rest of the plant.

ANSWER: **Phloem**

12.) Born in Sines, Portugal in 1469, he went from there to defend the Portuguese colonies on the Guinea coast against the French. After the death of his father, he was sent on his father's mission; set out on 8 July 1497, anchored in St Helena and Mossel Bays. He named the coast of Natal and continued on through Mozambique, Mombassa, and Melinda. Finally, on 20 May 1498, he reached his goal, the harbor of Calicut, India. For ten points, name this explorer, famous for discovering the sea route to the East Indies.

ANSWER: Vasco da Gama

13.) Educated in Argentina, his most famous work, centered on the writer Horacio Oliveira, invites the reader to rearrange the novel. Moving to Paris due to dissatisfaction with the Perón government, his works include: "Bestiary", *Cronopios* and *Famas*, and *A Manual for Manuel*. A proponent of magic realism FTP name this author of *Rayuela* or *Hopscotch* whose given name was Julio Denis.

Answer: Julio Cortazar

14.) Characterized by jidaimono, or historical dramas, and sewamono, or contemporary plays, many of the themes like love, righteous vengeance and honor were adapted directly from the bunraku stage. Like No, it is an all-male theater, but its lavish styles contrast sharply with the more conservative and restrained No drama. For ten points, name this Japanese drama form which has created a thriving celebrity subculture that endures today.

ANSWER: kabuki

15.) His generals in the West, Belisarius and Narses, destroyed the Vandal kingdom in Africa and defeated the Ostrogoths in Italy, retaking Rome in 536. Other highlights of his reign included the construction of Santa Sophia in Constantinople. No wonder he earned the epithet 'the Great!' For ten points, name this emperor, famous for his *Corpus juris civilis*, the foundation of the Roman law still used in many European countries.

ANSWER: Justinian I

16.) During his expedition to Kufa, he and his company were ambushed and massacred by Syrian Muslims loyal to the Umayyad Caliph, Yazid. This martyrdom is still celebrated today by Shi'ite Muslims with a ta'ziya, or "passion play." For 10 points, name this grandson of Muhammed whose martyrdom at Karbala marked the genesis of Shi'ism as a political movement within Islam.

ANSWER: Husayn or Hussein

17.) Applicable only to Holomorphic functions, it can be defined for complex functions by the Cauchy integral formula. Simplifying operations like integration and differentiation such that they may be done on a computer, the form may be taken over any number of real variables and may include a Cauchy or Lagrange remainder. Containing a special subset about the origin called Maclaurin series FTP name this series expansion of a function about a point named for a British Mathematician.

Answer: Taylor Series

18.)After a fire destroys her home, she is admitted into Rutledge Private Clinic and Asylum. There she is the subject of Doctor Hieronymous Q Wilson's experiments for ten years. When she answers a call for help, she finds herself 'down the rabbit hole' once more, but this time the landscape is dark and corrupted. Armed only with a knife and other 'toys' she finds along the way, she must defeat the evil Red Queen. For ten points, name her, and you name this popular computer game by Electronic Arts.

ANSWER: American McGee's Alice

19.)Romanticized in the 19th century by George MacDonald, her Hebraic character was much more frightening. Commonly portrayed with bird's feet, she is a female demon of the night who flies around searching for newborn children to kill and sometimes sleeps with men to seduce them into propagating demon sons. New mothers and their children were protected with amulets against her as late as the 18th century. For ten points, name this woman, declared in the middle ages to be the wife, concubine, and grandmother of Satan, but more often regarded as Adam's first wife.

ANSWER: Lilith

20.)He is known from Ovid and plays relatively little role in traditional Greek mythology, except that his name means "he who molds, or forms." The legends have grown up around him, however. He lies on a ebony bed in a dim-lit cave, surrounded by poppies. He appears to humans in their dreams in the shape of a man. He is responsible for shaping dreams, or giving shape to the beings which inhabit dreams. For ten points, name him, mentioned as the son of Hypnos, the God of Sleep.

ANSWER: Morpheus

21.)An optimist who believed that the social sciences had already given mankind the information basic to happiness, he advocated a planned, or "telic," society, called a "sociocracy" in which nationally organized education would be the dynamic factor. His most important work, Dynamic Sociology was influenced heavily by French sociologist Auguste Comte. For ten points, name this sociologist who was instrumental in establishing sociology as an academic discipline in the United States.

ANSWER: Lester Frank Ward

22.)When her husband, Florestan, is imprisoned by Pizarro, she disguises herself as a man and takes work as the jailor Rocco's assistant in hopes of aiding her husband. Rocco's daughter falls in love with her disguise, and Rocco approves their engagement. She earns the special task of bringing her husband food- but she is also assigned the task of digging his grave! When the grave is ready, Pizarro enters to kill her husband and she throws herself between them, thus saving her husband's life. For ten points, name this opera heroine, who disguised herself as Fidelio in the Beethoven opera.

ANSWER: Leonore (accept also Fidelio on an early buzz, although certainly not after Fidelio is mentioned!)

23.)The pretext for revolt was the introduction of the new Enfield rifle; to load it one had to bite off the ends of lubricated cartridges. After some members of the Bengali army

refused to bite cartridges because they were allegedly greased with pig and cow lard, an insult to both Muslims and Hindus, they were jailed, and their incensed comrades rose, shot their British superiors, and marched to Delhi. The efforts of Sirs Colin Campbell and Hugh Rose put down, for ten points, which rebellion, which resulted in the abolishment of the East India Company?

ANSWER: Sepoy Mutiny

24.) His novel *Headlong* was a candidate for the 1999 Booker Prize, but this versatile writer is better known as a playwright. Until recently, he was best known for the farce *Noises Off*, but he has achieved greater renown from a recent, far more cerebral, play. FTP, name this Brit, a winner at the 2000 Tony Awards for his play *Copenhagen*.

Answer: Michael Frayn

25.) A capital of European culture, it was a center for the arts and technological advances; home to a stunning national theater and several fine universities and the first city in Europe to install gas lamps. It is also famous for its many beautiful churches in many different styles, including the Ruler's Church at Cartea Veche, the Cretulescu Church, and the Stavropoleos Church. Vlad the Impaler mentioned it for the first time on Sept 20 1459, and 200 years later, this city, for ten points, became what capital of Romania?

ANSWER: Bucharest

26.) Nominated for ten Academy Awards, it is the story of a princess who rebels against her royal obligations and sets off to explore Rome on her own. She meets an American newspaper man who, seeking an exclusive story, feigns ignorance of her true identity. His plan falters, however, as they fall in love. Starring Gregory Peck and Eddie Albert, this film introduced Audrey Hepburn to the world. For ten points, name this 1953 film, for which Audrey Hepburn won an Oscar.

ANSWER: Roman Holiday
