One author from this nation wrote a novel in which a homosexual hairdresser spies on a political prisoner, entitled *Kiss of the Spider Woman*. Besides Julio Cortazar and Manuel Puig, this nation was home to an author who described the universe as a series of hexagonal rooms in "The Library of (*) Babel" and also wrote "The Garden of Forking Paths." For 10 points, name this home country of Jorge Luis Borges (HOR-hay LWEES BOR-hays).

ANSWER: <u>Argentina</u> [or <u>Argentine</u> Republic; or República <u>Argentina</u>]

16. This author wrote about the ridiculousness of a feathery creature with a horse's body and man's head in a letter to the Pisones. Thanks to his patron Maecenas, this poet lived on a "Sabine Farm" that he wrote of frequently. On poem by this man urges diligence against the Parthians and notes that it is sweet and (*) right to die for one's country. This poet praised Homer for beginning the Iliad "in medias res." For 10 points, name this Roman poet of four books of Odes and a manual of literary theory entitled *Ars Poetica*.

ANSWER: **Horace** [or Quintus **Horatius** Flaccus]

015-10-23-13117

17. A dice game goes on in the bottom right of an Emil Nolde painting of this scene, and Salvador Dali's depiction of it simultaneously explores the unfolding of a hypercube. The central figure wears a Jewish prayer shawl as a synagogue burns in the background in a Mark Chagall painting titled after a *White* version of this scene. Matthias Grünewald is also known for a depiction of this scene which contains a group of (*) weeping women and the Latin acronym INRI just above the central person's head. For 10 points, what scene depicts Christ on the cross?

ANSWER: Crucifixion [do not accept "Descent from the Cross"; do not accept "Deposition"]

003-10-23-13118

18. The Box-Mueller transformation converts a uniform distribution to this distribution. If the sum of two random variables has this distribution, then both of those random variables have this distribution by Cramer's Theorem. The distribution of sample means of any distribution converges to this distribution by the Central Limit Theorem. The integral of this function, the error function, allows one to calculate (*) probabilities based on z-scores, which represent the number of standard deviations away from the mean of this distribution. For 10 points, name this distribution that resembles a bell curve.

ANSWER: **normal** distribution [or **Gaussian** distribution; prompt on **bell curve**]

003-10-23-13119

19. According to Timothy Williamson, this concept is unanalyzable. Plato's dialogue *Theaetetus* deals with the definition of this concept. Its propositional variety is distinguished from the procedural variety, and it can be classified as *a priori* or *a posteriori*. Gettier problems are used to argue against the traditional definition of this concept as (*) justified true belief. For 10 points, name this concept which is studied in epistemology.

ANSWER: knowledge

024-10-23-13120

20. This future president led the "Amalgamator" faction in his home state. He was a longtime friend and roommate of the only Vice President to be sworn in on Cuban soil, William Rufus King. As president, he ardently supported the pro-slavery Lecompton Constitution for Kansas. Along with John Mason and Pierre Soulé, he signed the (*) Ostend Manifesto.
