This president's (*) assassination led to the passage of the Pendleton Act, since he was killed by disgruntled office-seeker Charles Guiteau. For 10 points, name this Republican President succeeded by Chester Arthur.

ANSWER: James Abram Garfield

080-11-29-04110

10. Some economists claim that this concept is obsolete because factors of production can be relocated. This theory was popularized by the author of *Political Economy and Taxation*, and it states that trade partners should specialize in processes for which they have lower opportunity costs. David Ricardo used an example involving (*) Portuguese wine and English cloth to demonstrate this concept. For 10 points, name this concept that shows that countries can benefit from trade despite having absolute advantage in production.

ANSWER: comparative advantage

085-11-29-04111

11. A version of this process that only occurs in prokaryotes is known as the Entner-Doudoroff pathway. Hexokinase is involved in the first step of the preparatory phase of this pathway, and during the pay-off phase a net gain of (*) 2 NADH and 2 ATP molecules is achieved by this pathway. For 10 points, name this common metabolic pathway that produces pyruvate from glucose.

ANSWER: glycolysis

12. After this man was left by his wife Marie Powell, he argued for the legality of divorce in a series of four pamphlets. This author wrote a closet drama about a man who had been blinded and had his hair cut after being captured by Philistines. This author of *Samson Agonistes* attacked censorship in the pamphlet *Areopagitica*. He included a figure who believes it is (*) "Better to reign in Hell than serve in Heaven" in an epic poem about the fall of Adam. For 10 points, name this author of *Paradise Lost*. ANSWER: John Milton

015-11-29-04113

13. This ruler was served by the official Ay and the general Horemheb, who succeeded this ruler upon his death as the final rulers of the dynasty of which this ruler was a part. This man possibly ended the Amarna Period begun by Akhenaten. Lord Carnarvon served as the sponsor to a man who discovered what ended up being named (*) KV62, this man's tomb, in 1922. For 10 points, name this Egyptian pharaoh of the Eighteenth dynasty whose tomb was discovered by Howard Carter and who died in his youth.

ANSWER: <u>Tut</u>ankhamun [or King <u>Tut</u>]

023-11-29-04114

14. This author wrote about some lighthouse workers who discover a sea monster is attracted to the title noise in "The Fog Horn." A computer maintains a post-apocalyptic house in his story "There Will Come Soft Rains." He wrote about the disastrous effect of stepping on a butterfly in the past in "A Sound of Thunder." In a novel by this author, a (*) Mechanical Hound hunts the fireman Guy Montag whose job involves burning books. For 10 points, name this author of *Fahrenheit 451*. ANSWER: Ray Douglas <u>Bradbury</u>

015-11-29-04115

15. These particles are found in muon, tau, and electron varieties, and their existence was originally proposed to maintain conservation of energy, momentum, and angular momentum in beta decay. These particles are affected by the weak force, and devices built to examine this particle must be very large because it is notably difficult to detect. (*) For 10 points, name this subatomic particle whose name suggests that it is smaller than a neutron.

ANSWER: neutrino

081-11-29-04116

16. Three men and crescent moons appear in this artist's *Mysteries of the Horizon*. A street lamp illuminates a scene of a house, tree, and pond in his *Empire of Light*. He created two different paintings titled *The Human Condition*. One of his works shows a train coming out of a fireplace. ANSWER: **Pontiac**'s Rebellion [or reasonable equivalents mentioning **Pontiac** such as **Pontiac's uprising**]

030-11-29-04120

20. The protagonist of this story is described as "one of those pretty and charming girls, born by a blunder of destiny in a family of employees." The protagonist of this story washes dishes for ten years in order to pay off a ruinous debt, which she incurred by attending a ball held by the Minister of Education. In this story, Madame Loisel pays (*) 36,000 francs to replace the title object, lent to her by Madame Forester, which she discovers is false. For 10 points, name this ironic story by Guy de Maupassant.

ANSWER: "The **Necklace**" [or "La **Parure**"]

080-11-29-04121

21. This man denounced the anti-semitism of a composer he had earlier praised. A work by this man contrasted Apollonian and Dionysian forms of the title entity's creation in ancient Greece. A parable by this man in *The Gay Science* tells of a man who breaks a lantern after informing a crowd that they are murderers. That madman's claim that (*) "God is dead" is expounded in a work that contains a Persian prophet returning from the mountains. For 10 points, name this German philosopher of *Thus Spake Zarathustra*.

ANSWER: Friedrich Nietzsche

002-11-29-04122

22. A "checkerboard" variety of this procedure is undergone by reagents in the ELISA assay. Another type of this process is named after Karl Fischer and used to determine the amount of water in a sample. One type of this process utilizes bromthymol (BROM-thigh-mol) blue or phenolphthalein (FEEN-ulth-ALE-een) depending on the strength of the acid and base involved. Those components are added until an (*) equivalence point is reached. For 10 points, identify this laboratory technique used to determine the concentration of a solution by adding incremental amounts of another known solution.

ANSWER: titration

23. The scenario for this musical work was first conceived by Nicholas Roerich (ROAR-ik), who designed its costumes and sets. Excerpts from it accompany an animation of the prehistoric earth and dinosaurs in Walt Disney's *Fantasia*. Subtitled "Pictures from Pagan Russia," this Sergei Diaghilev (dee-AH-gil-ev) production begins with a high bassoon solo. Its choreography by Vaslav Nijinsky ends with a young girl dancing (*) herself to death in a sacrificial ritual. For 10 points, name this ballet that caused a riot at its 1913 Paris premiere by Igor Stravinsky.

ANSWER: The <u>Rite Of Spring</u> [or Le <u>Sacre du printemps</u>; or <u>Vesna svyashchennaya</u>]

ANSWER: Charles-Louis de Secondat, baron de La Brède et de Montesquieu

015-11-29-04201

2. This man wrote a travelogue about a trip in his camper Rocinante with the title poodle in *Travels with Charley*. For 10 points each:

[10] Name this American author of East of Eden and In Dubious Battle.

ANSWER: John Steinbeck

[10] In this Steinbeck novel, the ranch owner's son Curley has his hand broken by Lennie Smalls, and Lennie accidentally breaks Curley's wife's neck.

ANSWER: Of Mice and Men

[10] In *The Grapes of Wrath*, this former preacher travels from Oklahoma to California with the Joads. This character is killed working as a strike organizer.

ANSWER: Jim Casy [accept either]

030-11-29-04202

3. With Kramers, this man gave a formula for photon scattering.

[10] Name this formulator of matrix mechanics.

ANSWER: Werner Heisenberg

[10] Heisenberg is known for this statement that one cannot accurately know the position and momentum an electron at the same time.

ANSWER: Heisenberg's uncertainty principle

[10] The uncertainty principle also applies to the combination of time and this quantity.

ANSWER: energy

001-11-29-04203

4. The most prominent symptom of this disease is suppression of T-helper cells, and the WHO describes it on a four stage system. For 10 points each:

[10] Name this immune disease caused by HIV.

ANSWER: <u>AIDS</u> (accept "acquired immune deficiency syndrome" or "acquired immunodeficiency syndrome")

[10] HIV can be treated by this class of drugs, which include nucleotide reverse transcriptase inhibitors that prevent reproduction of the virus.

ANSWER: antiretroviral drugs

[10] This antiretroviral that is a NRTI is a common drug used to treat AIDS. It has a crystal structure.

ANSWER: AZT (accept "Zidovudine" or "azidothymidine" or "ZDV")

- 5. This man wrote a poem in which a parting lover states, "Thy firmness makes my circle just." For 10 points each:
- [10] Name this author of "A Valediction: Forbidding Mourning" as well as "Death Be Not Proud."

ANSWER: John Donne

[10] John Donne also wrote this poem in which the title parasite is described as a "marriage temple."

ANSWER: "The Flea"

[10] "Batter My Heart," "Spit in My Face," and "Death, Be Not Proud" are among the nineteen poems in what John Donne collection, part of his *Divine Poems*.

ANSWER: *Holy Sonnets*

030-11-29-04205

6. This man's reputation was largely built on the journalism of Lowell Thomas. For 10 points each:

[10] Name this British soldier who served as a liaison for the revolt against the Ottoman Empire during World War I.

ANSWER: Thomas Edward <u>Lawrence</u> [or <u>Lawrence</u> of Arabia]

[10] Lawrence led an attack on the city of Aqaba in this country. This country's current king, Abdullah II, is a member of its Hashemite dynasty.

ANSWER: Hashemite Kingdom of **Jordan** [or Al Mamlakah al **Urdun**iyah al Hashimiyah]

[10] Lawrence related his experiences in this memoir, which takes its title from the Book of Proverbs.

ANSWER: Seven Pillars of Wisdom: A Triumph

015-11-29-04206

7. Name these ancient Greek sculptors, for 10 points each.

[10] This Greek master sculpted the Statue of Zeus at Olympia, one of the wonders of the ancient world. He also executed the Athena Parthenos.

ANSWER: **Phidias** [or **Pheidias**]

[10] This prolific sculptor of the *Aphrodite of Knidos* also sculpted *Hermes Bearing the Infant Dionysus* and the *Lizard-Killing Apollo*.

ANSWER: Praxiteles

[10] This sculptor worked primarily in bronze. Though his renowned statute of a heifer is not extant, there are many copies of his athletic *Discobolos* or *Discus-Thrower* in existence.

ANSWER: Myron of Eleutherae

026-11-29-04207

8. Identify some battles from the Revolutionary War, for 10 points each.

[10] General Cornwallis was forced to surrender to colonial forces in this final battle of the war fought in Virginia.

ANSWER: Battle of **Yorktown**

[10] The British were able to take Philadelphia following this 1777 colonial defeat near Chadd's Ford in southeastern Pennsylvania.

ANSWER: Lady Jane Grey

015-11-29-04211

- 12. In one story, this god kills a Cyclopes to avenge the murder of his sun Asclepius. For 10 points each:
- [10] Name this Greek god of light and music and sister to Artemis.

ANSWER: Apollo

[10] Apollo's most famous love interest may be this woman, who flees his advances before being turned into a laurel tree.

ANSWER: **Daphne**

[10] This woman is turned to a weeping rock after Apollo and Artemis kill her fourteen children.

ANSWER: Niobe

- 13. In this myth system, Ayar Manco defeats his three brothers to become Manco Capac. For 10 points each:
- [10] Name this myth system, whose supreme deity is Viracocha.

ANSWER: **Inca**n Mythology

[10] In Incan mythology, Viracocha sends one of these events down to punish mankind. Noah survives another of these cataclysms in the Bible.

ANSWER: **floods** [or **deluges**]

[10] This Incan sun deity taught Manco Capac the art of agriculture and ordered him to found Cuzco on the location where the *tupayauri* sank into the ground.

ANSWER: Inti

080-11-29-04213

- 14. A hooded man in a gray robe bows on the left of this work as Saint Stephen and Saint Augustine stand over the title nobleman's body. For 10 points each:
- [10] Name this painting in which Jesus and other heavenly figures prepare to welcome the soul of the title figure.

ANSWER: The **Burial of Count Orgaz**

[10] *The Burial of Count Orgaz* was painted by this Greek-Spanish artist who was born Domenikos Theotokopoulos.

ANSWER: El Greco

[10] This El Greco landscape depicts the Castle of San Servando and other landmarks of the title Spanish city under a stormy sky.

ANSWER: View of Toledo

015-11-29-04214

- 15. For 10 points each, give the year of the NCAA Men's Basketball Tournament whose championship games ended with these last-second finishes.
- [10] Gordon Hayward's half-court heave glanced barely off the backboard and rim, giving Duke a 61-59 victory over upstart Butler.

ANSWER: 2010

[10] Hakim Warrick blocked Michael Lee's game-tying three-point attempt with under a second left, helping Syracuse to its first-ever national championship.

ANSWER: 2003

[10] Lorenzo Charles dunked home Dereck Whittenburg's air ball to complete North Carolina State's upset of Houston's Phi Slamma Jamma team.

ANSWER: 1983

003-11-29-04215

- 16. For 10 points each, answer these questions about Bragg's law.
- [10] Bragg's law is typically used to describe this behavior, the bending of a light wave when it encounters a small obstacle. Its X-ray form was used to determine the structure of DNA.

ANSWER: diffraction

[10] Bragg's law contains this quantity, symbolized lambda, which for blue light is about 450 nanometers.

ANSWER: wavelength

[10] The wavelength of a particle like an electron can be found in an equation developed by this physicist. It states that a particle's wavelength is equal to Planck's constant divided by its momentum.

ANSWER: Louis de Broglie

- 17. Among the resources at this entity's disposal was the full text of Wikipedia, though it does not have live access to the Internet. For 10 points each:
- [10] Name this artificial intelligence that defeated Ken Jennings and Brad Rutter over two games of a recent *Jeopardy!* competition, despite providing responses such as "What is leg?" and asserting in Final Jeopardy that Toronto was in the U.S.

ANSWER: Watson

[10] Watson and the Shark is the most famous work of this American artist who also painted a portrait of Paul Revere and depicted a scene from *The Faerie Queen* in his *The Red Cross Knight*.

ANSWER: John Singleton Copley

[10] Johns Hopkins psychologist John B. Watson is most famous for this experiment, in which the association of a loud sound with a furry rat led the subject to fear objects such as the white beard of a Santa mask.

ANSWER: <u>Little Albert</u> experiment (accept "Baby Albert")

081-11-29-04217

- 18. This system of music contained four authentic modes and four plagal modes, and it was originally notated using neumes. For 10 points each:
- [10] Name this monophonic system of medieval church music named for the sixth-century pope who supposedly codified the use of music in Catholicism.

ANSWER: **Gregorian chant** [prompt on "plainchant"]

[10] This German nun and mystic composed several works of chant, including the morality play *Ordo Virtutum*. She is the oldest non-anonymous composer whose works survive to the present day.

ANSWER: **Hildegard** of Bingen

[10] Some of the earliest polyphonic music based on Gregorian chant was that of Leonin and Perotin, who wrote their works while serving at this famous Parisian cathedral.

ANSWER: **Notre-Dame** de Paris

082-11-29-04218

- 19. This chemist was guillotined in 1794. For 10 points each:
- [10] Name this French chemist, regarded as the father of modern chemistry.

ANSWER: Antoine-Laurent de **Lavoisier** (lah-vwah-zee-EH)

[10] Lavoisier was the first to state the law of the conservation of this quantity. According to relativity, its conservation is equivalent to the conservation of energy.

ANSWER: mass

[10] Lavoisier discredited this theory, which held that the namesake substance is released during combustion. It was first stated by Johann Becher.

ANSWER: **phlogiston** theory

024-11-29-04219

- 20. In January 2011, the non-Muslim southern portion of this nation voted in a referendum to declare independence. For 10 points each:
- [10] Name this nation led by Omar al-Bashir, the largest by land area in Africa.

ANSWER: Republic of Sudan

[10] Another troubled region in Sudan is this arid western region, where the janjaweed has carried out campaigns of violence against the native population.

ANSWER: **Darfur**

[10] This border region between South and North Sudan is under "special administrative status", and is home to significant but depleting oil production.

ANSWER: Abyei

21. It began in Independence, Missouri and usually concluded in the Willamette Valley. For 10 points each:

[10] Name this trail that was heavily worn during the Great Micration of '43.

ANSWER: **Oregon** Trail

[10] One of the landmarks encountered along the trail was a "gate" in Wyoming named for this figure. He is the namesake of cylindrical monolithic tower also in Wyoming.

ANSWER: **devil**

[10] Another landmark observed by those travelling the Oregon Trail was this 325 foot vertical stone projection atop a hill in western Nebraska.

ANSWER: **Chimney** Rock
